The Perfect Cup

Experience the art and innovation of customized brewing.

STATE-OF-THE-ART MACHINES

Whether you're a fan of traditional American coffee, classic Italian espresso or rich, creamy lattes and cappuccinos, you can count on Nespresso's innovative line-up of fully-automatic machines to deliver big, bold flavor using the latest brewing technologies. Whichever you choose, brewing the perfect

cup is as simple as popping in a capsule, selecting your cup size and pressing a button.

CUSTOMIZED COFFEE CAPSULES

Nespresso machines use state-of-the-art capsules for the ultimate coffee and espresso drinks. Premium coffee beans are perfectly roasted, measured, ground and tamped, then sealed in recyclable aluminum capsules for optimal freshness.

OriginalLine machines use a high-pressure (19-bar) system to extract full flavor and aroma from each capsule. New VertuoLine capsules each feature a bar code, which is scanned by a computerized system to ensure precise, blend-specific brewing.

GRAND CRU COFFEES

Nespresso's signature Grand Cru coffees

reflect the company's commitment to quality, sustainability and long-term relationships with the world's best coffee farmers – from bean to cup. Sourced from artisan growers around the globe, the hand-selected coffee beans are expertly blended, roasted and ground in Switzerland to showcase the unique flavors, aromas and terroir of each varietal.
