**PRODUCT SPECIFICATIONS**

- **Output voltage**: 5V / 1A
- **Operating voltage**: 3.7V
- **Output power**: 3W
- **LED lamp power**: 1W
- **Transmission distance**: 38 meters (125 feet)
- **Frequency response**: 20Hz – 20kHz
- **Dimensions**: 2.01 in W x 6.10 in D x 3.31 in H
- **Weight**: 0.7 lbs
- **Speaker**: 4Ω
- **SNR**: 90dB
- **Distortion**: 1%
- **Standby time**: 30 days
- **Water Resistant**: IP54
- **Drop-proof**: No

**ATTACHING TO YOUR GRILL**

You can attach the SoundBeam’s clamp to your grill’s handle or other narrow surface. Do not attach the SoundBeam close to any heat source.

- **Loosen the locking nut on the SoundBeam’s clamp and remove.**
- **When the locking nut is removed, you can open the clamp at its hinge.** It is recommended you leave the locking nut in the top clamp to avoid losing it.
- **Fit the clamp over your grill’s handle or other surface and close the clamp, threading the locking bolt through the hole in the bottom clamp so that the clamp is fully closed.**
- **Reattach the locking nut to the exposed locking bolt at the bottom of the clamp, and tighten to secure.**

**CONNECTING TO YOUR PHONE**

Connecting and Staying Connected

The Bluetooth® connection between the SoundBeam and your phone works best within a range of 125 feet, with no obstructions between the SoundBeam and your phone. Beyond this distance you may experience a decline in connectivity and sound quality, or a lost connection.

How to Reconnect:

1. If you lose the link between your SoundBeam and your phone, your SoundBeam will attempt to reestablish automatically.
2. If the auto-reconnect attempt fails, please manually reconnect through your phone’s Bluetooth menu.

**STARTUP AND SHUTDOWN**

Start/Stop the power switch to “ON.”

**CHARGING**

- **When the power of the SoundBeam is low, there will be a warning tone to remind you to charge it.**
- **You must use a current of 1A or above to charge the SoundBeam.** The indicator light will turn red when the SoundBeam is successfully charging. A blue light will flash when the SoundBeam is charged above 75%. Charging is complete when both the red and blue lights stay on continuously.

**CHARGING (Continued)**

- **The charging time will vary depending on different adapters, such as the wall adapter and USB computer adapter.**

**FUNCTIONS**

- **Pressing the “5W” button will cycle through the SoundBeam’s different modes in the following order.**
  1. Bluetooth
  2. Storage card
  3. AUX
- **Note**: If your SoundBeam is plugged in via AUX cable, the mode will default to AUX. If there is a storage card inserted into your SoundBeam, the mode will default to storage card. Removing the AUX cable or storage card will automatically switch the SoundBeam’s mode to Bluetooth.

**QUICK START SPEAKER GUIDE**

**BLUETOOTH MODE**

- **Switch to “ON.”** You will hear a beep and a voice that says “Bluetooth device is ready to pair!”
- **Use the blue LED light to see the pairing status.**
- **Search for Bluetooth device, SoundBeam, on your phone.**
- **Click to link, and you can now play music from your phone.**
- **While in Bluetooth mode, you should always stay within a range of 125 feet.**
- **On your phone, you can receive incoming calls, and your phone will play the music through your speaker.**
- **When you end a call, the speaker will automatically switch to “OFF.”**
- **Long press (5s) to switch to previous and next songs.**
- **Press “M” button to pause / play your music.**
- **Press “P” button to switch modes.**

**STORAGE CARD MODE**

- **Insert your storage card.**
- **You will hear a beep and a voice that says, “Storage card mode / music player.”**
- **The music from your storage card will play.**
- **Short press (5s) to switch to previous and next songs.**
- **Long press the keys to adjust volume.**
- **Press “M” button to pause / play your music.**
- **Press “P” button to switch modes.**

**AUX MODE**

- **Plug in the AUX cable.**
- **You will hear a beep and a voice that says “Auxiliary mode.”**
- **Press “M” button to pause / play your music.**
- **Press “P” button to switch modes.**

**LIGHTING**

- **To cycle through lighting modes, press the [POWER] button.** You will see the following lighting modes in the following order:
  1. [Bright Light]
  2. [Regular Light]
  3. [Off]

**MOBILE POWER BANK**

If your phone needs to be charged, insert a USB cable into the SoundBeam to connect your phone.

**LOW POWER REMINDER**

During use, if the power is low, you will hear a voice that says, “Low battery.” Please charge your SoundBeam at that time.

**NOTES**

- Do not throw product into fire, or put it in contact with combustible materials.
- Do not disassemble or repair.
- Keep the product in a dry place.
- **Before charging, please make sure any adapter you use is compatible with your SoundBeam.**
- Do not use the SoundBeam while charging. It is recommended you charge your SoundBeam at least once a month.

**WARNING**

Any changes or modifications without the expressed written consent of the manufacturer will void any user warranty and could result in damage to the device. Recharging the battery improperly may be an explosion hazard – DO NOT ATTEMPT.

**FCC REQUIREMENTS**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference, including interference which may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- **Reorient or relocate the receiving antenna.**
- **Increase the separation between the equipment and receiver.**
- **Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.**
- **Consult the dealer or an experienced radio/TV technician for help.**
