For your safety and continued enjoyment of this product, always read the instruction book carefully before using.
IMPORTANT SAFEGUARDS

When using an electrical appliance, basic safety precautions should always be adhered to, including the following:

1. READ ALL INSTRUCTIONS.
2. Always unplug unit from outlet when not in use, before putting on or taking off parts and before cleaning. To unplug, grasp plug and pull from electrical outlet. Never pull cord. Allow to cool before handling.
3. To protect against risk of electric shock, do not put motor base in water or other liquids.
4. Close supervision is necessary when any appliance is used by or near children.
5. Do not operate any appliance with a damaged cord or plug, after the appliance malfunctions, or if appliance has been dropped or damaged in any manner. Return the appliance to the nearest authorized Cuisinart Service Facility for examination, repair, and electrical or mechanical adjustment.
6. The use of attachments not recommended or sold by Cuisinart may cause fire, electric shock or injury.
7. Do not let cord hang over edge of table or counter, or touch hot surfaces.
8. Do not plug in or take out plug when your hands are wet.
9. Do not use outdoors.
10. Do not touch hot surfaces. Use handles or knobs.
11. Do not operate your appliance in an appliance garage or under a wall cabinet. When storing in an appliance garage always unplug the unit from the electrical outlet. Not doing so could create a risk of fire, especially if the appliance touches the walls of the garage or the door touches the unit as it closes.
12. Do not use the appliance for other than intended use.
13. Where applicable, always attach plug to appliance and check that the control is off before plugging cord into wall outlet. To disconnect, turn the control to OFF, then remove plug from wall outlet.
14. Do not place on or near a hot gas or electric burner, or in a heated oven.

SAVE THESE INSTRUCTIONS

FOR HOUSEHOLD USE ONLY

SPECIAL CORD SET INSTRUCTIONS

A short power supply cord is provided to reduce the risks of becoming entangled in or tripping over a longer cord. Extension cords may be used if care is exercised.

If an extension cord is used, the marked electrical rating of the extension cord should be at least as great as the electrical rating of the appliance. The longer cord should be arranged so that it will not drape over the countertop or tabletop, where it can be pulled on by children or tripped over unintentionally.

NOTICE

This appliance has a polarized plug (one prong is wider than the other). As a safety feature, this plug will fit into a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

PARTS AND ACCESSORIES
1. Scoop
2. Housing Lid
3. Yogurt Container Lid
4. Yogurt Container
5. Control Panel with LED display
6. Detachable Cord
7. Housing
BEFORE THE FIRST USE
Carefully unpack the unit and remove any packaging and promotional labels in or on the yogurt maker. Rinse all accessories thoroughly in warm soapy water, then dry completely.

INTRODUCTION
The Cuisinart Electronic Yogurt Maker takes the guesswork out of making yogurt at home. Simply mix together ingredients and pour into the yogurt container, letting the yogurt maker do the rest. You will love the ready-to-eat chilled results.

Homemade yogurt is a healthy and more economical option to store-bought yogurt. Not only a great source of protein and calcium, yogurt also contains probiotics, or good bacteria, that are crucial for a healthy digestive system.

Either plain or flavored, yogurt is the perfect anytime food to enjoy alone, with granola or in your morning smoothie. Yogurt is also a great ingredient to have on hand in the kitchen for delicious and moist baked goods, as a secret ingredient to marinades for meat and poultry, and also the perfect vehicle for soups and sauces.

OPERATION

1. Put all of the ingredients in the yogurt container and then cover it with the yogurt container lid.

2. Place the filled container into the housing and cover with the housing lid.

3. Plug the unit in and the default* fermentation time will begin flashing on the screen. To change the fermentation time (1–24 hours) using the “+” and “-” buttons, then press the START button.

* 8 hours is the default starting point, but refer to recipes for more specific guidelines.
Note: In the case that the yogurt maker is accidentally turned off during the cooling process, it is possible to skip fermentation and proceed directly to cooling mode. To do so, scroll down past 1 hour and the LED will display “C”. Once START is pressed, the cooling mode will begin.

4. Once desired fermentation time is flashing on the LED display, press the START button. At this point the fermentation numbers on the LED will become solid and fermentation countdown will begin.

**NOTE:** To change the fermentation time during operation, press the STOP button. The fermentation time will begin flashing again and you can adjust the time using the “+” and “-” buttons. Once adjusted time is shown flashing on the screen, press the START button again and the unit will adjust the time accordingly.

5. After the fermentation is complete, the unit will automatically switch into cooling mode and display “C” in the LED. As long as the unit is plugged in, it will stay in cooling mode until you turn the unit off. After 8–12 hours the temperature of the yogurt will be between 43 and 52 degrees Fahrenheit (6–11 degrees Celsius).

Note: Yogurt will be at its best and should be eaten within the first three days after completion. Yogurt can be kept for up to 8 days.

6. To turn the unit off or end the cooling cycle, press and hold the STOP button for 3 seconds.

7. Once the unit is off, you can either remove the yogurt container and place it directly in the refrigerator, or use the yogurt scoop provided and divide yogurt into individual portions.
CULTURES AND FERMENTATION

The taste, texture and consistency of your yogurt will depend on the type of culture that is used. Each type of culture contains different bacteria strains with individual properties that affect the tang and taste of the yogurt as well as its texture. Some yogurts are meant to be thin and runny where others are meant to be thick.

Yogurt can be fermented from a purchased culture or from yogurt that is either store bought or homemade with a reusable culture.

Use only one type of culture per batch of yogurt. Mixing cultures may force different bacteria that are not meant to coexist to compete with one another instead of properly fermenting.

Fermenting times vary depending on the type of culture used. There are two types of yogurt cultures – direct-set and reusable. These two types of cultures also vary depending on yogurt flavor – Bulgarian, Piima, Greek, etc.

Direct set cultures can be used only once and take less time to ferment, about 8–12 hours.

Reusable cultures take longer the first time used, up to 16 hours. When used again as a culturing agent, the fermentation time will be shorter, about 6–8 hours.

The Cuisinart® Electronic Yogurt Maker uses thermophilic culture. Thermophilic (heat-loving) culture needs an elevated temperature to ferment as opposed to mesophilic culture, which is best suited to ferment at room temperature. If you are unaware of what type of culture you have, check the ingredient list of the culture or ask your supplier.

When fermenting with store-bought yogurt, the average fermentation time is 6 hours.

The fermenting time can always be increased or decreased while yogurt maker is in operation.

HEATING AND CONSISTENCY

Different cultures yield different results, with some producing thinner yogurts than others. If after making a batch of yogurt thicker results are desired, we recommend following the step for heating the milk below before adding the yogurt base to the yogurt maker.

Heating the milk breaks down its proteins, allowing yogurt to coagulate, facilitating the thickening process during fermentation.

Heat milk on the stove to 180°F (some cultures recommend only 160°F, so follow the instructions per the particular culture).

For best results (but not essential), keep milk at this temperature for about 20 minutes.

Cool milk until a thermometer reads 110°F. Once cooled to 110°F, stir in culture and any other thickening agent into the milk so that it is fully incorporated. Transfer mixture to the yogurt maker and set the appropriate fermentation time.

If following the recommended step, subtract one to two hours from the fermentation time.

Adding dry milk powders to a culture-based yogurt will add to the thickness in the final product. For every 4 cups of milk add ¼ to ½ cup powdered milk when using cow’s milk, and ½ to 1 cup milk powder to the base when using goat’s milk.

Other thickeners can also be used to thicken yogurt. Always make a slurry with the thickener and a small amount of the milk before mixing into the entire batch.

Approximate amounts for 4 cups milk:
  - Tapioca starch – 2 tablespoons
  - Agar-agar powder – ½ teaspoon (dissolve into ½ cup water, bring to a boil and then cool before adding to mixture)
  - Cornstarch – 2 tablespoons
  - Powdered gelatin – 1 teaspoon
Finished Yogurt and Taste

We recommend checking consistency of yogurt during the fermentation process to avoid over-culturing. Begin checking yogurt on the earlier side of the recommended time range.

Yogurt should have some body and be slightly firm when fully fermented.

Always stir yogurt before serving.

Yogurt starts to over-culture when whey begins to separate. Yogurt is over-cultured when curds and whey have completely separated.

More time can always be added to under-cultured yogurt, even if it has been through the cooling cycle. However, once over-cultured, yogurt is no longer edible.

Longer fermentation times will produce a tangier yogurt, but also aid in thickening.

Strain yogurt overnight using a strainer lined with a coffee filter, for an ultra-rich and thick treat.

Do not consume any yogurt that smells, looks or tastes displeasing.

We recommend using whole milk for making yogurt, and avoiding ultra-pasteurized milk. Fuller-fat milks produce thicker yogurts.

When adding a flavor to yogurt, we recommend waiting until 6 hours after the cooling process has begun. Flavors can also be added to individual portions as needed instead of to the entire batch.

Certain flavors may shorten the shelf life of yogurt. Fruit mix-in flavors last longer and are better added to the entire batch, while sweeter syrups are best added to individual portions.

Troubleshooting

Q: What kind of milk can I use for my yogurt?
A: You can use any kind of milk, including whole milk, 2%, 1%, nonfat, pasteurized, homogenized, organic, raw, cow, goat, soybean, and more. Fuller-fat milks produce thicker yogurts.

Q: What kind of culture should I use for my yogurt?
A: Yogurt can be fermented from a purchased culture or from yogurt that is either store bought or homemade with a reusable culture.

Q: Where can I purchase yogurt cultures?
A: Different cultures can be found in health stores or specialty food stores. They can also be purchased from different sources online.

Q: Why is the consistency of my yogurt so thin?
A: Fermentation may not have been long enough. More time can always be added to an under-cultured yogurt.

A: Culture was damaged.

Q: How do I make my yogurt thicker?
A: Increase the fat content of the milk used in the recipe.

A: Strain the finished yogurt using cheese cloth until desired consistency is achieved.

A: Heat the milk prior to adding to the yogurt maker. See the Tips and Hints section for more information.

A: Adding dry milk powder or other thickening agents such as gelatin or cornstarch can help thicken the yogurt. Refer to Tips and Hints section for more information.
Q: Why did my yogurt curdle?
A: Yogurt has been over-fermented. Reduce fermentation time and begin checking yogurt on the earlier side of the recommended time range.
A: Culture was damaged.

Q: Why is my yogurt separated into two layers? (Solid on top and liquid underneath)
A: Separation is a sign that your culture has died. Exposure to temperatures over 100°F can cause this.
A: Contamination can also cause the culture to die. Be sure that when you clean your yogurt container that no food particles or soap are left behind.

Q: My yogurt appears to be set, but there is a small amount of thin liquid on top. Is this OK?
A: Yes, this is whey. Some separation is fine and is a natural occurrence within the culture process.

Q: How do I add a flavor to my yogurt?
A: We recommend waiting until 6 hours after the cooling process has begun before adding flavors. Flavors can also be added to individual portions as needed instead of to the entire batch.

CLEANING AND MAINTENANCE
Always make sure the appliance is unplugged before you start cleaning it.
Cleaning Accessories and Housing/Base:
Rinse the yogurt container, yogurt container lid and housing lid immediately after each use so food doesn’t dry on them. All can be washed with warm soapy water or on the top rack of the dishwasher.
Wipe the housing/base clean with a damp sponge or cloth. Dry it immediately. Never submerge the base or the plug in water or other liquids.

Storage
The Cuisinart Electronic Yogurt Maker stores neatly on the countertop in a minimum of space. When it is not in use, store the unit assembled to prevent loss of parts.

The Cuisinart Electronic Yogurt Maker is intended for HOUSEHOLD USE ONLY. Any service other than cleaning and normal user maintenance should be performed by an authorized Cuisinart Service Representative.

WARRANTY
Limited 3 Year Warranty
This warranty is available to consumers only. You are a consumer if you own a Cuisinart Electronic Yogurt Maker that was purchased at retail for personal, family or household use. Except as otherwise required under applicable law, this warranty is not available to retailers or other commercial purchasers or owners.
We warrant that your Cuisinart Electronic Yogurt Maker will be free of defects in materials and workmanship under normal home use for 3 years from the date of original purchase.
We recommend that you visit our website, www.cuisinart.com for a fast, efficient way to complete your product registration. However, product registration does not eliminate the need for the consumer to maintain the original proof of purchase in order to obtain the warranty benefits. In the event that you do not have proof of purchase date, the purchase date for purposes of this warranty will be the date of manufacture.
If your Cuisinart Electronic Yogurt Maker should prove to be defective within the warranty period, we will repair it, or if we think necessary, replace it. To obtain warranty service, simply call our toll-free number 1-800-726-0190 for additional information from our Customer Service Representatives, or send...
the defective product to Customer Service at Cuisinart, 7811 North Glen Harbor Blvd., Glendale, AZ 85307.

To facilitate the speed and accuracy of your return, please enclose $10.00 for shipping and handling of the product.

Please pay by check or money order (California residents need only supply proof of purchase and should call 1-800-726-0190 for shipping instructions).

NOTE: For added protection and secure handling of any Cuisinart product that is being returned, we recommend you use a traceable, insured delivery service. Cuisinart cannot be held responsible for in-transit damage or for packages that are not delivered to us. Lost and/or damaged products are not covered under warranty. Please be sure to include your return address, daytime phone number, description of the product defect, product model number (located on bottom of product), original date of purchase, and any other information pertinent to the product's return.

CALIFORNIA RESIDENTS ONLY:
California law provides that for In-Warranty Service, California residents have the option of returning a nonconforming product (A) to the store where it was purchased or (B) to another retail store that sells Cuisinart products of the same type.

The retail store shall then, at its discretion, either repair the product, refer the consumer to an independent repair facility, replace the product, or refund the purchase price less the amount directly attributable to the consumer’s prior usage of the product. If the above two options do not result in the appropriate relief to the consumer, the consumer may then take the product to an independent repair facility if service or repair can be economically accomplished. Cuisinart and not the consumer will be responsible for the reasonable cost of such service, repair, replacement, or refund for nonconforming products under warranty.

California residents may also, according to their preference, return nonconforming products directly to Cuisinart for repair, or if necessary, replacement, by calling our Consumer Service Center toll-free at 1-800-726-0190. Cuisinart will be responsible for the cost of the repair, replacement, and shipping and handling for such products under warranty.

BEFORE RETURNING YOUR CUISINART PRODUCT
If you are experiencing problems with your Cuisinart product, we suggest that you call our Consumer Service Center at 1-800-726-0190 before returning the product for service. If servicing is needed, a representative can confirm whether the product is under warranty and direct you to the nearest service location.

Your Cuisinart Electronic Yogurt Maker has been manufactured to the strictest specifications and has been designed for use only in 120-volt outlets and only with authorized accessories and replacement parts. This warranty expressly excludes any defects or damages caused by attempted use of this unit with a converter, as well as by use with accessories, replacement parts or repair service other than those authorized by Cuisinart. This warranty does not cover any damage caused by accident, misuse, shipment or other than ordinary household use. This warranty excludes all incidental or consequential damages. Some states do not allow the exclusion or limitation of these damages, so these exclusions may not apply to you. You may also have other rights, which vary from state to state.

Important: If the nonconforming product is to be serviced by someone other than Cuisinart's Authorized Service Center, please remind the servicer to call our Consumer Service Center at 1-800-726-0190 to ensure that the product is still under warranty.
Cuisinart offers an extensive assortment of top quality products to make life in the kitchen easier than ever. Try some of our other countertop appliances, cookware, tools and gadgets.

Chocolate Pretzel Frozen Yogurt

The combination of sweet and savory is what makes this tangy dessert a real standout.

Makes 5 cups (ten ½-cup servings)

4 cups plain yogurt
1 cup granulated sugar
1/3 cup cocoa powder, sifted
pinch kosher salt
1 cup low-fat milk
1/2 teaspoon pure vanilla extract
1 cup chopped chocolate-covered pretzels

1. Line a fine mesh strainer with 1 to 2 paper coffee filters and position it over a bowl. Fill the paper-lined strainer with the yogurt and drain in the refrigerator overnight. Transfer the strained yogurt to an airtight container and freeze at least 2 hours. Remove from freezer 15 minutes before serving.

2. In a large bowl, whisk the strained yogurt, sugar, cocoa powder, salt, milk and vanilla together until the sugar has dissolved. Add the chopped pretzels into the churning yogurt to fully mix. Transfer the frozen yogurt to an airtight container and freeze for at least 2 hours or overnight.

3. Process in a Cuisinart® Ice Cream Maker according to the model's instructions. A few minutes before the frozen yogurt is finished, add the chopped pretzels into the churning yogurt to fully mix.

4. The consistency will be soft and creamy, but if a firmer texture is desired, transfer the frozen yogurt to a medium bowl and whisk with a wooden spoon until the desired consistency is reached. Cover with plastic wrap and refrigerate at least 2 hours or overnight.

**Raita**

This classic Indian condiment is incredibly versatile; use as a dip for flatbreads, a cooling agent alongside spicy dishes, or as a sauce for kebabs.

Makes about 1 1/2 cups

2 cups plain yogurt
8 ounces English cucumber, shredded and squeezed dry
2 garlic cloves, peeled and finely chopped
1/8 teaspoon ground cumin
large pinch kosher salt
1 tablespoon finely chopped fresh mint (about 25 mint leaves)

1. Line a fine mesh strainer with 1 to 2 paper coffee filters and position it over a bowl. Fill the paper-lined strainer with the yogurt and drain for 1 hour.

2. Remove yogurt from liner and put in a bowl with remaining ingredients. Stir to combine and chill in refrigerator until ready to serve. Adjust seasoning as desired.

**Tzatziki**

The Greek cousin of raita, this sauce benefits from time in the refrigerator so the flavors can develop. For a thicker consistency, drain the yogurt in the refrigerator overnight.

Makes about 1 3/4 cups

2 cups plain yogurt
8 ounces English cucumber, shredded and squeezed dry
2 garlic cloves, peeled and finely chopped
1 tablespoon fresh lemon juice
1/4 teaspoon lemon zest
large pinch kosher salt
1 tablespoon finely chopped fresh dill

1. Line a fine mesh strainer with 1 to 2 paper coffee filters and position it over a bowl. Fill the paper-lined strainer with the yogurt and drain for 1 hour.

2. Remove yogurt from liner and put in a bowl with remaining ingredients. Stir to combine and chill in refrigerator until ready to serve. Adjust seasoning as desired.
# Yogurt-Marinaded Lamb Chops

Serve this Greek-inspired dish alongside our Tzatziki on page 9.

**Makes 6 servings**

4 garlic cloves, peeled and finely chopped
1 tablespoon chopped fresh mint
1 teaspoon chopped oregano
¼ cup plain yogurt
1 lemon, zested and juiced
½ teaspoon kosher salt
6 lamb loin chops, 1-inch thick (about 1¾ pounds)
1 teaspoon vegetable oil

1. Combine all ingredients except oil in a large bowl, tossing lamb to make sure it is evenly coated.
2. Cover bowl with plastic wrap and allow lamb to marinate in the refrigerator for 2 hours and then 1 hour at room temperature.
3. Preheat a Cuisinart® Griddler fitted with the grill plates and in the closed position, to High. When preheated, brush plates with oil. Grill lamb until it reaches desired doneness, about 6 minutes per side for medium-rare.
4. Allow lamb to rest for 5 minutes and serve.

# Black Peppercorn and Herbed Yogurt Dip

This dip makes a great addition to any crudités plate. Feel free to swap the herbs for whatever you have on hand.

**Makes about 1 cup**

¾ teaspoon kosher salt
¾ teaspoon lemon zest
1 tablespoon finely chopped tarragon
1 tablespoon finely chopped chives
2 cups plain yogurt

1 teaspoon vegetable oil

1 teaspoon lemon, squeezed
1 cup plain yogurt
1 teaspoon coarse salt
1 tablespoon chopped oregano
1 tablespoon chopped fresh mint
4 garlic cloves, peeled and finely chopped

1. Line a fine-mesh strainer with 1 to 2 paper coffee filters and position it over a bowl. Fill the paper-lined strainer with the yogurt and drain in the refrigerator overnight.
2. Between two pieces of wax paper, crush the black peppercorns with the bottom of a heavy skillet. Add crushed pepper and remaining ingredients, including strained yogurt, to a small bowl. Stir to combine and chill in the refrigerator until ready to serve. Adjust seasoning as desired.

3. Prepare the cake: Put the flour, baking soda, cream of tartar and salt in a medium mixing bowl; whisk to combine. Put butter and granulated sugar in a large mixing bowl. Using a hand mixer, blend on medium-low speed for about 1 minute, until the mixture is light and fluffy. Add the eggs, one at a time, and mix until smooth. Scrape down the sides of the bowl and add vanilla. Mix until incorporated.

4. Add half the dry ingredients and half the yogurt to the butter sugar mixture. Mix until blended, about 30 seconds. Scrape down the sides of the bowl and add remaining dry ingredients and yogurt. Mix about 30 seconds longer until smooth and all ingredients are blended.

5. Pour batter into prepared pan and smooth the top. In a single layer, evenly arrange blueberries over the top of the cake and lightly press into the batter. Evenly spread crumb mixture all over top of blueberries.

6. Bake for 55 to 60 minutes, or until crumb topping is evenly golden brown and a tester comes out clean when inserted into the center of the pan. Remove from oven and place on a wire rack to cool. Cool completely before cutting.

Crunchy Granola

Adapted from one of our favorite New York Times recipes, this accompanied by homemade yogurt is a great way to start the day.

Makes about 8½ cups

- 3 cups old-fashioned rolled oats (not quick-cooking)
- 1½ cups raw cashews
- 1 cup unsweetened shredded coconut
- ½ cup sunflower seeds
- ½ cup hulled pumpkin seeds (pepitas)
- ½ cup pure maple syrup
- 1/3 cup olive oil
- 2 tablespoons packed dark brown sugar
- 1 teaspoon kosher salt
- ½ teaspoon ground cinnamon
- ½ teaspoon ground cardamom (optional)
- 1/8 teaspoon ground nutmeg
- 1 cup dried cranberries

1. Preheat the oven to 325ºF.

2. In a large mixing bowl combine all ingredients except for the dried fruit. Evenly spread on a parchment-lined baking sheet and bake for 40 to 45 minutes, stirring halfway through, until nicely toasted.

3. Add dried cranberries and stir to combine. Allow to cool completely on baking sheet. Transfer to an airtight container to store for up to 3 weeks.

Yogurt Blueberry Crumb Cake

Sweet and tender, this cake stays moist with the addition of yogurt. Pair with a cup of coffee or a scoop of vanilla ice cream for an after-dinner treat.

Makes one 9-inch cake (12 servings)

**Cooking spray**

**Crumb Topping:**
- 1 cup plus 2 tablespoons unbleached all-purpose flour
- 1 tablespoon packed dark brown sugar
- 1 teaspoon ground cinnamon
- 1/4 teaspoon pure vanilla extract
- 1 cup packed light brown sugar
- 1 stick (1/4 cup) unsalted butter, room temperature, cubed

**Yogurt Cake:**
- 1 1/4 cups unbleached all-purpose flour
- 1/2 teaspoon baking soda
- 1/2 teaspoon cream of tartar
- 1/4 teaspoon kosher salt
- 1 stick (1/2 cup) unsalted butter, room temperature, cubed
- 1 cup granulated sugar
- 2 large eggs, room temperature
- 1/2 teaspoon pure vanilla extract
- 1/2 cup plain yogurt
- 1 1/4 cups blueberries

1. Preheat oven to 350ºF. Coat a 9-inch square baking pan with cooking spray; reserve.

2. Prepare the crumb topping: Put all topping ingredients in a medium bowl and with your hands, mix, working in butter cubes until large clumps form. Evenly spread on a parchment-lined baking sheet and bake for 40 to 45 minutes, stirring halfway through, until nicely toasted.

3. Add drizzled cranberries and stir to combine. Allow to cool completely on baking sheet. Transfer to an airtight container to store for up to 3 weeks.

Coffee Syrup

Be sure to save some of your morning brew for this recipe.

Makes 1⁄3 cup syrup

1 cup strong brewed coffee
½ cup granulated sugar

1. Stir coffee and sugar together in a small saucepan and bring to a boil over medium-high heat. Cook until the mixture has reduced by about 2⁄3 and is thick and syrupy, about 35 minutes. Cool completely.

2. Stir into yogurt to taste and serve immediately. It is best to stir about 1 tablespoon per individual serving as opposed to adding to a full batch.

Mango Lassi

The ripeness of the mango and your personal preference will determine how much sugar is needed. Taste your fruit prior to adding it to the blender and use the amount of sugar listed below as a starting point.

Makes six ½-cup servings

1½ cups plain yogurt
1 ripe mango, peeled and cut into ½-inch pieces
½ teaspoon ground cardamom
½ teaspoon ground cinnamon
pinch kosher salt
4 ice cubes
1 tablespoon granulated sugar
1 tablespoon chopped pistachios, unsalted (for finishing)

1. Put the yogurt, mango, spices and ice cubes into a blender. Blend for 1 minute on high until smooth. Taste and add sugar, ½ tablespoon at a time, until desired sweetness is reached.

2. Divide into serving cups and garnish with pistachios.

1 tablespoon granulated sugar
Maple Vanilla Yogurt
A simple and delicious flavor made with ingredients you probably have on hand.

Makes about 1 quart yogurt

3 tablespoons pure maple syrup
1 tablespoon pure vanilla extract
1 quart plain yogurt

1. Stir ingredients together and serve.

Note: Syrup and vanilla may be added to the yogurt during the cooling phase after it has been cooling for at least 6 hours. Stir mixture into pre-made yogurt or into yogurt during the cooling phase of the yogurt-making process after it has been cooling for at least 6 hours.

Nutritional information per serving:

Blueberry Yogurt
A great way to use fresh blueberries. The sweet fruit and tangy yogurt pair well together.

Makes about 1 quart yogurt

2 tablespoons honey
2 pints fresh blueberries
½ teaspoon pure vanilla extract
¼ teaspoon orange zest
1 quart plain yogurt

1. Put honey in small saucepan over medium heat. Once honey begins to bubble, add the blueberries, vanilla and zest and stir over medium heat until blueberries begin to break down and thicken, about 20 minutes.

2. Remove from heat and let cool completely. During the last minute of cooking, stir in the almond extract.

3. Remove from heat and let cool completely.

4. Stir mixture into pre-made yogurt or into yogurt during the cooling phase of the yogurt-making process after it has been cooling for at least 6 hours.

Nutritional information per serving:

Cherry-Almond Yogurt
Nutty and sweet, this yogurt is also delicious as a frozen yogurt or a popsicle.

Makes about 1 quart yogurt

2 cups sweet red cherries, pitted and halved
2 tablespoons granulated sugar
pinch kosher salt
¾ teaspoon pure almond extract
1 quart plain yogurt

1. Stir together the cherries, sugar and salt into a medium saucepan set over medium heat; bring to a boil.

2. Reduce heat to medium-low and allow to simmer until cherries have softened and liquid has reduced and thickened, about 30 to 40 minutes.

3. Remove from heat and let cool completely.

4. Stir mixture into pre-made yogurt, or into yogurt during the cooling phase of the yogurt-making process after it has been cooling for at least 6 hours.

*(To make yogurt pops, just pour into ice pop mold and freeze overnight.)*

Nutritional information per serving:

Nutritional information per serving:
3. Yogurt has switched from ferment to cool when the time has counted down and “C” is visible on the display panel. Let yogurt stay on cool mode for a minimum of 12 hours before removing from unit.

4. Stir well and serve immediately or store in refrigerator until ready to eat.

Nutritional information per serving:

Soy Yogurt

If you are sensitive to cow's milk, goat's milk can be a great alternative.

Makes about 1 quart yogurt

6 ounces goat milk

4 cups goat milk

1 tablespoon yogurt cultures

1 tablespoon liquid pectin

2 cups unsweetened soy milk, divided

Makes about 1 quart yogurt

Goat Milk Yogurt

Makes about 1 quart yogurt

1 packet vegan yogurt culture

1 tablespoon liquid pectin

2 tablespoons cornstarch

4 cups unsweetened soy milk

Makes about 1 quart yogurt

With this recipe you can still enjoy yogurt even if you do not eat dairy.

Soy Yogurt

4. Stir well and serve immediately or store in refrigerator until ready to eat.

Soy Yogurt

4. Stir well and serve immediately or store in refrigerator until ready to eat.

Nutritional information per serving:
Introduction

As we stress yogurt making results vary, we encourage you to experiment with different cultures and fermenting times to create yogurt that suits your taste. We recommend heating and cooling the milk as a tip for thicker and more consistent yogurt. Note that if using a culture that includes milk powder in the list of ingredients, this step is not necessary or recommended.

Heat milk on the stove to 180°F (some cultures recommend only heating to 160°F, so follow the instructions per the particular culture). For best results (but not essential), keep milk at this temperature for about 20 minutes.

Cool milk until a thermometer reads 110°F. Once cooled to 110°F, stir culture and any other thickening agents into the milk well so that it is fully incorporated.

Transfer mixture to the yogurt maker and set the appropriate fermentation time. If following this heat and cooling step (when adding the base to the unit at 110°F) subtract an hour or two from the fermentation time.

Nutritional information per (¼ cup) serving:

Plain Yogurt Variation #1

This yogurt recipe uses a purchased culture to produce a delicious yogurt. Remember that yogurt cultures differ depending on variety, so the end results in taste and consistency can also vary.

Makes about 1 quart yogurt

4 cups whole milk

1 packet yogurt culture

½ cup dry milk powder

1. Whisk ingredients together well in a medium stainless steel bowl (whisking well ensures ingredients are completely incorporated).

Plain Yogurt Variation #2

This yogurt recipe uses a purchased culture to produce a delicious yogurt. Remember that yogurt cultures differ depending on variety, so the end results in taste and consistency can also vary.

Makes about 1 quart yogurt

4 cups whole milk

6 ounces plain whole milk yogurt (use only plain, homogenized yogurt)

1. Whisk ingredients together well in a medium stainless steel bowl (whisking well ensures ingredients are completely incorporated).

Nutritional information per (⅛ cup) serving:
