1. Install the threaded nipple (C) with hickey and nut into the ceiling box. You must provide a 1/4 IPS threaded nipple which will go through the top of ceiling box and through a structural member of building.
2. Put canopy (E) to ceiling loop(D), and secure with lock collar (F).
3. Using the dimensions of the fixture as a guide, shorten the chain (G) as needed using a pair of chain pliers.
4. Take into consideration that you will use the chain end link to mount the chandelier once you have removed the excess chain.
5. Unscrew the threaded collar on the chain end link. Attach the chain to the ceiling loop (D). Close the threaded collar to secure the chain.
6. Unscrew the threaded collar on the other chain end link. Raise the fixture and attach chain end link to the top ring (H). Close the threaded collar to secure the fixture body.
7. Unwrap the wiring from the top of the fixture body. Weave the power supply cord and the ground wire through the chain (G).
8. When you reach the canopy and ceiling loop, measure the wires and cut. Be certain to leave enough to connect inside of the canopy.
9. Strip the insulation back on the two power supply wires about 5/8".
10. Twist the power supply and ground wires together and push through the center hole in the ceiling loop.
11. Loosen the lock collar (F), let the canopy (E) slip down the chain carefully.
