Warning

- All L'Art du Jardin wood fired ovens are for use outdoors only - do not use them in any enclosed area
- Always follow all instructions and safety manuals.
- Use only hardwood or chunk charcoal - do not use soft woods (pine), painted or stained wood, pressure treated wood or wood treated with other preservatives.
- Always wear protective clothing, including heat resistant gloves and apron.
- Do not move the oven after the fire has started and before the oven is cool.
- Use only on flat and level surfaces.
- Assembly requires two adults capable of safely lifting 110 pounds each (50 Kg).
- Although every effort is made to machine all edges it is possible for some edges to be sharp - do not run any part of your body along any edges.
- Always wait until the fire is out and the oven cool before cleaning or covering.
- Never use an abrasive cleaner on any of the oven’s surfaces.
- WHEN USING THE OVEN MAKE SURE THE FLAME LEVEL IS NOT DANGEROUSLY HIGH.

Note: By products from the combustion of charcoal, wood and other fuels are known by the state of California to cause cancer, birth defects, and other reproductive harm.

Before using

- Remove all packing materials and discard.
- Remove the cooking stones and carefully set aside, do not drop as they can break. Do not use detergent on the cooking stones.
- Clean the inside and outside of the oven using warm water and a mild detergent to remove the special coatings applied during the manufacturing process, as well as any residue or moisture build up that may occur during transportation. These materials can emit unpleasant smells when the oven is lit for the first time.
- After the oven is dry replace the stones. Then light a fire in the box allowing it to burn as written page 4 in «Starting the fire for the first time». Allow the fire to burn at approximately 350°F/175°C for a minimum of 2 hours.
Starting the fire for the first time

- Obtain some small size dry wood, no longer than 12 inches/30 cm.
- Make sure the fire box is inserted all of the way into the oven.
- Insure that the Ash Tray is inserted under the fire box as showed page 5.
- Open the oven door and carefully insert the cooking stones in the oven.
- For seasoning use hardwood, no longer than 12 inches, 30 cm, or chunk charcoal.
- Light the fire in the firebox.
- Insure that the air vents on the firebox door are in the open position.
- Stoke the fire every 10 minutes.
- Maintain a temperature of 350F/175°C for at least 2 hours, opening the oven door every few minutes to allow odors to escape.
- Allow oven to cool before storing or moving.
Before Using Napoli V1 Oven:

- Carefully read all instructions and guides paying attention to all warnings.
- Napoli oven is designed for consumer use only, commercial use voids all warranties.
- Before using, remove all packing materials, stickers and protective wraps and discard.
- Follow carefully the section titled «Starting the fire for the first time» prior to using the oven.
- **DURING USE ALL OVEN SURFACES GET VERY HOT - DO NOT TOUCH, KEEP CHILDREN AND PETS AWAY FROM THE OVEN. ALWAYS USE HEAT RESISTANT GLOVES WHEN USING THE OVEN. ALLOW THE OVEN FIRE TO GO OUT THE OVEN TO COOL DOWN BEFORE CLEANING OR REMOVING ASHES.**
- Keep all operating manuals handy and refer to them prior to each use.
Operating the Oven

Napoli outdoor wood-fired Oven is easy to use and produces excellent results! By design, it uses less wood than comparable models making it very economical as well.

You can use Napoli as an oven for baking artisan pizzas and breads, tarte flambes, vegetables, meats, fish and desserts - just like using your home kitchen oven.

Napoli oven will quickly become an outdoor social hub for family, friends and fun as you prepare a wide variety of delicious meals laced with the delicate smoke of a smoldering wood fire. In every season, it’s easy to bake just about anything in the wood-fired oven. Meals will be more memorable cooked outdoors in Napoli, with the aromatic scents of crispy artisan pizzas, succulent roasts, juicy grilled ribs or slow-cooked stews for your family and friends.

The Napoli oven is manufactured using double wall construction, two pieces of 1/8th inch steel separated by an air space. The heat travels up to quickly heat the thick stones on the oven floor and at the same time moves through the air space on the sides providing radiant as well as direct heat for cooking. Uniquely, due to it’s very thick cooking stones Le Boulanger can cook for up to two hours after the fire goes out. An added health factor is the fact 95% of the smoke travels up through the air space to the chimney, avoiding the overly smoked flavor of many ovens.

The Left side of the Oven unit have a convenient cook’s work station shelf with towel bar.

Following the Starting the Fire instructions in this manual the Napoli will be ready to bake in 20 minutes, and within 30-40 minutes the stones will be the perfect temperature to bake in the oven.

Planking, roasting, baking, grilling – the cooking possibilities are endless using the patented Napoli wood-fired oven from L’Art du Jardin.

Starting the fire

It will take approximately 30-45 minutes to reach baking temperatures. We suggest you use a remote infrared thermometer to measure the temperature of the baking stones surface. The built in door thermometers measure the air temperature inside the oven for traditional oven baking.

1°) Choose the right fuel:
Only use fuels that do not produce noxious fumes. For best results we recommend hardwood (12 inches by 4) or chunk charcoal. Do not use timber that has a high resin content such as pine or any treated or painted wood.

2°) Fire starters:
Avoid using fire starters such paper or cardboard, it will produce excessive amount of debris. Use kindling or fire starters designed for grills. Open the fire chamber door and place the fire starters on the fire grate.

3°) Place the fuel in the fire grate:
Use the right fuel as described in point 1. Do not over-charge. Four chunks will be enough to start.

4°) Set the vent knob:
When starting the fire open the air vent all the way, adjust the burn rate and temperature by adjusting the vent during cooking. Do not exceed a temperature of over 500°F/260°C on the built in thermometer. If so, close a bit the vent knob. Do not cook, grill or bake when the flames are excessively high- it is best to wait until the flames have died down and the hot coals are providing the heat source. The double walls of the Napoli wood-fired oven provide enough heat to cook even after the fire going out.

Cooking

When the Napoli wood-fired oven is ready to bake, the chef can prepare any dish that can be prepared in a traditional oven - with the added flavor of a true wood fired oven. Napoli cooking is a social occasion: cooking for family and friends in the garden is a fun social gathering.

Maintenance

1°) ALLOW NAPOLI OVEN TO COMPLETELY COOL BEFORE PERFORMING MAINTENANCE.

2°) «Always use a fire proof container for all ashes and coals when cleaning the oven. Do not dump ashes and coals where they could cause a fire.»

3°) Empty the fire box residue into a fire proof container.

4°) Empty the ash tray into the fire proof container.

5°) Sweep or vacuum with appropriate steel bbq vacuum cleaner any ashes out of the firebox area.

6°) Remove the cooking stones - DO NOT USE DETERGENTS OR SOAPS TO CLEAN THE STONES.

7°) Clean the inside of the oven using a warm soapy water and non-abrasive scrubber if needed.

8°) Clean the cooking stones by scraping with a non-abrasive plastic scraper or brush. Hot water can be used to remove grease and oils. DO NOT PUT WET STONES BACK IN THE OVEN - WET STONES CAN CRACK VOIDING THE OVEN’S WARRANTY.

9°) Cleaning the outside of the oven : Wipe the outside of Le Boulanger oven with a wet rag and some gentle cleaning soap. Be careful not to use a wire brush as you don’t want to scratch off any paint.

10°) Storage : Make sure the Napoli wood-fired oven is cool to the touch and has been cleaned; using the cover supplied with the oven store it in a protected space.

PROPER MAINTENANCE AND CLEANING WILL PROLONG THE LIFE OF YOUR OVEN, PROVIDING MANY YEARS OF GREAT FOOD AND FUN FOR THE ENTIRE FAMILY.

Assembly manual V1

L’Art du Jardin

123 Faubourg des vosges

68700 Cernay France
Step 1

Remove the oven from the box and remove the ash tray, the fire box and carefully remove the cooking stone; it is fragile.

Step 2

Remove one of the Styrofoam blocks from the box and lay it on the ground. Carefully lay the oven on the Styrofoam as shown on the diagram.

Step 3

Unscrew the 4 screws and keep them to fix the feet at step 4.
Step 4

The front wheels lock to prevent movement during cooking. Make sure they are inserted into the front legs as shown on the diagram.

Note: the legs are designed so each leg design will be an unused hole in only one position on each leg. The storage shelf attaches to only one point on each leg (front, back, left or right). The legs are designed so they can be used as any movement during cooking. Make sure the front wheels lock to prevent...
Step 5

Attach the storage shelf as shown. Now tighten all bolts before standing the oven upright.

At this step, confirm that all screws are fastened tightly.

Note: The oven is very heavy, we suggest that at least two people be used to bring the oven to an upright position. When setting the oven in an upright position, lift the oven feet. The oven should be supported on the feet before standing the oven upright. All the storage shelves can be attached.
Step 6

Insert the ash tray and fire box as shown in the diagram.
Step 7
Carefully insert the cooking stone as shown in the diagram.

Step 8
Attach the chimney and chimney cap as shown.

Step 9
Enjoy your L’Art du Jardin Le Boulanger outdoor wood fired oven.
