

## Instructions:

1. Please read carefully the following instructions and keep them safely for future reference.

### 2. Switching on and off

2-1. Turn the ring to adjust the air flow until half the hole can be seen through the opening.

2-2. Turn the gas regulator in an anti-clockwise direction to open the gas flow.

2-3. Press the 'on' button to light the torch.

2-4. Turn the gas regulator in a clockwise direction to turn out the flame.

### 3. Adjusting the flame

3-1. Turn the gas regulator in an anti-clockwise to increase the flame, or in a clockwise direction to reduce the flame.

3-2. Adjust the airflow to regulate the flame.

### 4. Recharging the gas

4-1. Incorrect recharging can cause accidents.

4-2. Make sure the flame is completely turned out before recharging.

4-3. Recharge the torch in a well ventilated room, away from any inflammable material and other persons. Do not smoke.

4-4. Recharge with butane gas only.

4-5. Turn the torch upside down.

4-6. Insert the end of the gas bottle into the recharging valve.

4-7. Press on the gas bottle until the gaz overflows.

The torch itself and settings made by the factory must not be changed.

5. Do not change the structure of the torch or take out any parts, or use any spare parts that have not been recommended for this torch.

### 6. Warning

Read carefully this instruction leaflet and keep it for future reference.

- Keep the torch out of the reach of children.
- Keep the torch away from your face and clothes when turning it on.
- The torch contains a pressurized gas which is highly inflammable.
- Never perforate the torch or throw it in the fire.
- Make sure the flame is out after use.
- Only use butane gas.
- Do not use a damaged torch.
- Never put down a lighted torch.
- Leave the torch to cool before putting it away.
- Always carry and store the torch upright.
- Use only recommended spare parts.
- Never repair a damaged torch.
- Never direct the flame towards another person.
- Warning ! The flame is not always visible in the sun.
- Wear protective gloves and other protective clothing when manipulating the torch.
- Avoid any contact with your skin and eyes.
- Keep a fire extinguisher or bucket of water near to the torch.
- Do not touch the opening with any metal or hard object.
- Do not store the torch at a temperature of over 40° C (for example in a car during the summer).
