IMPORTANT SAFEGUARDS

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock and/or injury to persons, including the following:

READ ALL INSTRUCTIONS.

1. The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instructions concerning use of the appliance by a person responsible for their safety.

2. Always unplug appliance from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts and before cleaning the appliance.

3. To protect against the risk of electric shock, do not put cord, plugs or appliances in water or other liquids.

4. The use of attachments/accessories not sold or recommended by Braun may cause fire, electrical shock or risk of injuries to persons.

5. Regularly inspect the power cord, power plug and actual appliance for any damage. Do not operate if damaged in any way or after the appliance malfunctions. Immediately cease use of the appliance and call Braun Customer Service for examination, repair or adjustment.

6. Do not use outdoors or for anything other than its intended purpose.

7. Snap lid securely onto carafe before serving any coffee.

8. Scalding may occur if the reservoir cover is opened during the brewing cycle.

9. The glass carafe is designed for use with this appliance only. It must never be used on a range top or in a microwave oven.

10. Do not set a hot carafe on a wet or cold surface.

11. Do not use cracked carafe or a carafe having a loose or weakened handle.

12. Do not clean carafe or keep warm plate with abrasive cleansers, steel wool pads, or other abrasive materials.

13. Do not immerse in water.

14. Do not touch hot surfaces. Use handles and buttons.

15. Do not let cord hang over edge of table or counter, or touch hot surface.

16. Do not place on or near a hot gas or electric burner, or in a heated oven.

17. Always fill water reservoir first, then plug cord into the wall outlet. To disconnect, press the «On/Off» button, then remove plug from wall outlet.

18. Warning: Risk of fire or electric shock. Do not remove the base panel. No user serviceable parts are inside. Repair should be done by authorized service personnel only.

19. Do not operate your appliance in an appliance garage or under a wall cabinet. When storing in an appliance garage always unplug the unit from the electrical outlet. Not doing so could create a risk of fire, especially if the appliance touches the walls of the garage or the door touches the unit as it closes.

20. Never open the reservoir cover during the brewing cycle, even if no water is draining from the filter basket, since extremely hot water/coffee can spill out from the filter basket and cause injury. If water/coffee is not draining from the filter basket during the brewing cycle, unplug the unit and wait 10 minutes before opening the top cover and checking the filter basket.

21. We suggest you save all packing materials in the event that future shipping of the machine is needed. Keep all plastic bags away from children.

22. This appliance has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician.

23. Do not modify the plug in any way.
Gold tone permanent filter

Reservoir cover and shower head

Filter basket

Cord storage

Flip lid

Glass carafe

Keep warm plate

Travel mug, 20oz*

2-sided coffee measuring scoop

Water reservoir cover

Charcoal water filter

Charcoal water filter holder

Removable water reservoir incl. handle

Lever

Beverage size option selector

Control panel and clock

On/Off button

Cup holder

Keep warm plate indicator

Travel mug, 20oz*

2-sided coffee measuring scoop

* included with certain models only
### EN Control Panel

Display shows the following options:

- Time of the day
- Temperature (F/C) (certain models only) – Hot water function
- Freshness Indicator – Provides an indication of your coffee freshness based on the period of time since brewing started.

**Functions:**

**Auto on:** Use to program the start time of the brew cycle and activate the brew cycle.

**Set:** Use to program the time of day and auto on.

**Clock:** Use to set/change time of day.

**Over Ice:** Use to brew over –ice coffee.

**Light/Gold/Bold:** Use to select the brew mode and start the brew cycle.

**Temp:** Use to select the water temperature when heating up water. To change from F to C press at the same time for a few seconds.

**Water:** Use to begin the water dispensing.

**Clean:** Descaling indicator and use to activate the descaling process.

**On/Off button:** Use to switch on/off the unit.

### FR Control Panel

Display shows the following options:

- Time of the day
- Temperature (F/C) (certain models only) – Hot water function
- Freshness Indicator – Provides an indication of your coffee freshness based on the period of time since brewing started.

**Functions:**

**Auto on:** Use to program the start time of the brew cycle and activate the brew cycle.

**Set:** Use to program the time of day and auto on.

**Clock:** Use to set/change time of day.

**Over Ice:** Use to brew over –ice coffee.

**Light/Gold/Bold:** Use to select the brew mode and start the brew cycle.

**Temp:** Use to select the water temperature when heating up water. To change from F to C press at the same time for a few seconds.

**Water:** Use to begin the water dispensing.

**Clean:** Descaling indicator and use to activate the descaling process.

**On/Off button:** Use to switch on/off the unit.

### ES Control Panel

Display shows the following options:

- Time of the day
- Temperature (F/C) (certain models only) – Hot water function
- Freshness Indicator – Provides an indication of your coffee freshness based on the period of time since brewing started.

**Functions:**

**Auto on:** Use to program the start time of the brew cycle and activate the brew cycle.

**Clock:** Use to set/change time of day.

**Over Ice:** Use to brew over –ice coffee.

**Light/Gold/Bold:** Use to select the brew mode and start the brew cycle.

**Temp:** Use to select the water temperature when heating up water. To change from F to C press at the same time for a few seconds.

**Water:** Use to begin the water dispensing.

**Clean:** Descaling indicator and use to activate the descaling process.

**On/Off button:** Use to switch on/off the unit.
**EN Before first use**

Please read instructions carefully and completely before using the appliance.

Remove all packaging material and stickers from the appliance.

Switch on the appliance.

Set «time of day» and «water hardness level» (see explanation in dedicated paragraphs hereafter).

Run the coffee maker through a complete brew cycle without ground coffee. Use a full carafe (10 cups) of fresh cold water. This will remove any dust from the manufacturing process or residues that have remained in the unit.

During the setting process the information displayed will be saved after 10 seconds.

**EN Time of day**

When the coffee maker is first plugged in or when power is restored after an interruption, the display starts flashing 2:00 AM and you hear an acoustic signal.

**EN Water hardness level**

Set the water hardness level on the coffee maker to the water hardness level for your local area.

1. Switch on the appliance and press CLEAN for 2 seconds.
2. The default setting (h3) is flashing.
3. Press SET to scroll through the options (h1 = soft, h2 = normal, h3 = hard) and select the appropriate water hardness level.
4. Press CLEAN to save the hardness level.

**FR Before first use**

Please read instructions carefully and completely before using the appliance.

Remove all packaging material and stickers from the appliance.

Switch on the appliance.

Set «time of day» and «water hardness level» (see explanation in dedicated paragraphs hereafter).

Run the coffee maker through a complete brew cycle without ground coffee. Use a full carafe (10 cups) of fresh cold water. This will remove any dust from the manufacturing process or residues that have remained in the unit.

During the setting process the information displayed will be saved after 10 seconds.

**FR Time of day**

When the coffee maker is first plugged in or when power is restored after an interruption, the display starts flashing 2:00 AM and you hear an acoustic signal.

**FR Water hardness level**

Set the water hardness level on the coffee maker to the water hardness level for your local area.

1. Switch on the appliance and press CLEAN for 2 seconds.
2. The default setting (h3) is flashing.
3. Press SET to scroll through the options (h1 = soft, h2 = normal, h3 = hard) and select the appropriate water hardness level.
4. Press CLEAN to save the hardness level.

**ES Before first use**

Please read instructions carefully and completely before using the appliance.

Remove all packaging material and stickers from the appliance.

Switch on the appliance.

Set «time of day» and «water hardness level» (see explanation in dedicated paragraphs hereafter).

Run the coffee maker through a complete brew cycle without ground coffee. Use a full carafe (10 cups) of fresh cold water. This will remove any dust from the manufacturing process or residues that have remained in the unit.

During the setting process the information displayed will be saved after 10 seconds.

**ES Time of day**

When the coffee maker is first plugged in or when power is restored after an interruption, the display starts flashing 2:00 AM and you hear an acoustic signal.

**ES Water hardness level**

Set the water hardness level on the coffee maker to the water hardness level for your local area.

1. Switch on the appliance and press CLEAN for 2 seconds.
2. The default setting (h3) is flashing.
3. Press SET to scroll through the options (h1 = soft, h2 = normal, h3 = hard) and select the appropriate water hardness level.
4. Press CLEAN to save the hardness level.
Use of the charcoal water filter is optional, but strongly recommended. The filter eliminates chlorine, bad tastes and odors from tap water. The coffee maker will operate normally without it. Replacement water filters can be purchased in stores, through the Braun website, or by calling Customer Service.

To switch on the coffee maker press the On/Off button (H). The green indicator light will illuminate indicating that the coffee maker is in “ready” mode. Time of the day is displayed.

NOTE: When switching on and the lever is in position “Drip Stop”, the On/Off button starts flashing.

To switch off the coffee maker, press the On/Off button again. The green indicator light will turn off indicating that the coffee maker is in “stand by” mode. Time of day remains visible.

NOTE: If the On/Off button is pressed and no further function is selected within 60 seconds the coffee maker goes into “stand by” mode. The last selected brewing mode and the LED of the On/Off button disappear. To get out of stand by mode, press the On/Off button.
EN Programming the Coffee Maker

EN Before programming, always switch the coffee maker on.

NOTE: The coffee maker features a 60-second power loss back-up system that remembers all program-
med information, including time of day and auto on time in the event of a power interruption.

EN Setting the AUTO ON Time

The AUTO ON time can be set for any time, day or night. "PM" is displayed on the LED for nighttime program times.

1. Place the lever in position “Coffee” or “Drip Stop”.
2. Press AUTO ON for a minimum of 2 seconds.
3. The time of day in the display starts flashing.
4. Press and hold SET to scroll through the hours. Release it once the desired hour is displayed.
5. To set the minutes, press AUTO ON. The minutes in the display starts flashing.
6. Press and hold SET to scroll through the minutes. Release it once the desired minutes is displayed.
7. Press AUTO ON to save the desired time.
8. The set auto on time disappears after a few seconds and the time of day shows on the display.

EN Activate the AUTO ON Time

This function can only be activated if the AUTO ON time and the time of the day have been set.

• Place the lever (E) in position “Coffee” and select the beverage size (F).
• Place the carafe or your empty cup underneath the brew basket outlet. For smaller cups use the Single-serve cup holder.
• Press AUTO ON and select the desired taste. AUTO ON turns permanently on. The coffee maker will start to brew at the preset auto on time.
• The preset AUTO ON time and the selected taste disappears after a few seconds.
• To switch off the function, press AUTO ON again: AUTO ON will disappear.

FR Programming the Coffee Maker

FR Before programming, always switch the coffee maker on.

NOTE: The coffee maker features a 60-second power loss back-up system that remembers all program-
med information, including time of day and auto on time in the event of a power interruption.

FR Setting the AUTO ON Time

The AUTO ON time can be set for any time, day or night. "PM" is displayed on the LED for nighttime program times.

1. Place the lever in position “Coffee” or “Drip Stop”.
2. Press AUTO ON for a minimum of 2 seconds.
3. The time of day in the display starts flashing.
4. Press and hold SET to scroll through the hours. Release it once the desired hour is displayed.
5. To set the minutes, press AUTO ON. The minutes in the display starts flashing.
6. Press and hold SET to scroll through the minutes. Release it once the desired minutes is displayed.
7. Press AUTO ON to save the desired time.
8. The set auto on time disappears after a few seconds and the time of day shows on the display.

FR Activate the AUTO ON Time

This function can only be activated if the AUTO ON time and the time of the day have been set.

• Place the lever (E) in position “Coffee” and select the beverage size (F).
• Place the carafe or your empty cup underneath the brew basket outlet. For smaller cups use the Single-serve cup holder.
• Press AUTO ON and select the desired taste. AUTO ON turns permanently on. The coffee maker will start to brew at the preset auto on time.
• The preset AUTO ON time and the selected taste disappears after a few seconds.
• To switch off the function, press AUTO ON again: AUTO ON will disappear.

ES Programming the Coffee Maker

12. If the size options \( \frac{1}{2} \) or \( \frac{3}{4} \) have been selected the coffee maker goes into the keep warm function and the LED (J) turns on. After 2 hours the coffee maker switches off automatically.
**EN Recommended Use of 2-sided coffee measuring scoop**

- When using paper filters, be sure that it is completely open and fully inserted in the basket. It may help to fold and flatten the seams of the paper filter beforehand.
- Once the coffee has finished brewing, stir it before serving to blend the flavors. The coffee at the bottom of the carafe will be somewhat stronger than the coffee at the top.

- Once the coffee has finished brewing, stir it before serving to blend the flavors. The coffee at the bottom of the carafe will be somewhat stronger than the coffee at the top.
1. Press the On/Off button.
2. Place the lever (E) in position “Coffee”.
3. Fill water in the water reservoir.
4. Fill your desired carafe/cup half with ice cubes and place it below the filter basket.
5. Select the beverage size (F).
6. Press the “Over Ice” button.
7. Select the Bold brew mode to start the brewing cycle.
8. The selected brew mode and the On/Off button (H) are illuminated continuously during the brewing process.
9. The unit will beep when the brew is complete and the selected brew mode and “Over Ice” turn off.
10. Place the lever (E) in position “Drip Stop”.

NOTE: Be sure the cup size fits to the selected beverage size. Never fill ice cubes in the water reservoir. We recommend using the carafe or a thermo-resistant glass.
**Pause during brewing process**

1. Move the lever (E) to “Drip Stop” position.

2. The brewing process will be paused and the selected brewing mode is flashing.

3. The lever should be moved back to the “Coffee” position within maximum 2 minutes.

4. The brewing process will be continued.

**NOTE:** If the lever is not moved back to “Coffee” position, the brewing process is terminated with an acoustic signal. If you pause the brewing process the GOLD/SCA brew mode requirements might not be met.

---

**Dispensing hot water**

1. Fill water in the water reservoir.

2. Place the carafe on the keep warm plate or a cup on the cup holder.

3. Press the On/Off button.

4. Place the lever (E) in position “Hot Water”. The buttons “Water” and “Temp” are illuminated. The default temperature is shown in the display.

**Dispensing hot water**

1. Fill water in the water reservoir.

2. Place the carafe on the keep warm plate or a cup on the cup holder.

3. Press the On/Off button.

4. Place the lever (E) in position “Hot Water”. The buttons “Water” and “Temp” are illuminated. The default temperature is shown in the display.

Frequency will depend upon the hardness of your tap water and how often you use the coffee maker.
We recommend using the Braun Descaling Solution (can be purchased in stores, through the Braun website, or by calling Customer Service).

1. CLEAN is flashing.
2. Fill the descaling solution (follow packaging instruction on the descaling agent) in the water reservoir.
3. Remove the gold tone permanent filter (Q) and the charcoal filter (B).
4. Place the empty carafe in its position on the keep warm plate (H).
5. Place the lever in position “Coffee”.

CLEAN turns permanently on and the countdown timer starting from “25” appears in the display.

Once the descaling process has started, it is not possible to stop the program until finished.

8. When the water reservoir is empty the countdown timer in the display shows “7” and CLEAN starts flashing.

9. Empty the carafe.
10. Refill the water reservoir with a full carafe (not exceeding 10 cups) of fresh water, place the empty carafe on the keep warm plate and press again CLEAN to start the rinsing cycle.
11. When the descaling program has been completed, the On/Off button and CLEAN turn off.
12. Empty the carafe and rinse it thoroughly with water.

We recommend using the Braun Descaling Solution (can be purchased in stores, through the Braun website, or by calling Customer Service).

1. CLEAN is flashing.

5. Place the lever in position “Coffee”.

CLEAN turns permanently on and the countdown timer starting from “25” appears in the display.

Once the descaling process has started, it is not possible to stop the program until finished.

8. When the water reservoir is empty the countdown timer in the display shows “7” and CLEAN starts flashing.

9. Empty the carafe.
10. Refill the water reservoir with a full carafe (not exceeding 10 cups) of fresh water, place the empty carafe on the keep warm plate and press again CLEAN to start the rinsing cycle.
11. When the descaling program has been completed, the On/Off button and CLEAN turn off.
12. Empty the carafe and rinse it thoroughly with water.
Always turn coffee maker off and remove the plug from the electrical outlet before cleaning.

Lift up the reservoir cover. Remove the gold tone permanent filter and discard the ground coffee.

Remove the carafe from the keep warm plate and discard any remaining coffee.

The filter basket, gold tone permanent filter, carafe including lid and the water reservoir including lid can be washed in warm, soapy water and rinsed thoroughly, or cleaned in the upper rack of the dishwasher. Dry all parts after use.

Do not use any scouring agents or harsh cleansers on any part of the coffee maker.

Never immerse the unit in water or other liquids.

To clean base, simply wipe with a clean, damp cloth and dry before storing.

Do not put any water in the unit once the filter basket has been removed. Wipe the area under the filter basket with a damp cloth.

Fingerprints and other blemishes on the housing can be wiped off with soap and water or a non-abrasive cleaning solution.

Do not dry the inside of the water reservoir with a cloth, as lint may remain.
