- For your safety, assembly by four or more adults is strongly recommended.
- Keep these instructions for future use.
- Use only vendor-supplied hardware to assemble this item. Using unauthorized hardware could jeopardize the structural integrity of the item.

#### Pre-assembly:

- Remove all parts and hardware from the box. Place all items on a carpeted or scratch-free work surface, as this will avoid damaging parts during assembly. The shipping box provides an ideal work surface.
- To avoid accidentally discarding small parts or hardware, do not dispose of any packaging or contents of the shipping carton until assembly is complete.
- Use the parts and hardware lists below to identify and separate each of the pieces included.
- The illustrations provided allow for easier assembly when used in conjunction with the assembly instructions.
- The use of power tools to aid in assembly is not recommended. Power tools can damage the hardware and split the wood.

#### Parts Included:

- (A) Stone Top (x1)
- (B) Table Base (x1)

#### Assembly Instruction Steps:

1. Remove the drawer boxes by pulling them all the way out, as seen in the illustration below.

2. Slowly place the Stone Top (A) onto the Table Base (B), as seen in the illustration below.

Note: 4 persons are strongly recommended for this step due to the weight of the Stone Top. Gently slide in the Stone Top (A) with the other hand assisting the bottom, until it is perfectly seated. Make sure to position it in the middle, leaving a uniform gap at all sides.

3. Put the drawers back into their original position.
4. If the Kitchen Island does not sit level, adjust the levelers (either in or out) underneath the posts, as seen in the illustration below.
5. Assembly is complete.

#### Care Instructions:

- Dust often using a clean, soft, dry, and lint-free cloth.
- Blot spills immediately and wipe with a clean, damp cloth.
- We do not recommend the use of chemical cleansers, abrasives, or furniture polish on our lacquered finish.
- For glass tops and shelves, glass cleaner may be used, but avoid spraying it onto the metal or ceramic frame.
- Hardware may loosen over time. Periodically check to make sure all connections are tight. Re-tighten if necessary.
