INTRODUCTION

Thank you for choosing this automatic espresso and cappuccino machine.

We hope you enjoy using your new appliance.

Take a few minutes to read these instructions.

This will avoid all risks and damage to the machine.

Symbols used in these instructions

Important warnings are identified by these symbols.

It is vital to respect these warnings.

Danger!

Failure to observe the warning could result in life threatening injury from electric shock.

Important!

Failure to observe the warning could result in injury or damage to the appliance.

Danger of burns!

Failure to observe the warning could result in scalds.

Please note:

This symbol identifies important advice or information for the user.

Letters in brackets

The letters in brackets refer to the legend in the Description of the Appliance on pages 2 and 3.

Troubleshooting and repairs

In the event of problems, first try and resolve them following the information given in the section "Displayed messages" on page 20 and "Troubleshooting" on page 21.

If this does not resolve the problem or you require further information, you should consult Customer Experience by calling the number given on the annexed "Customer Experience" sheet. If your country is not among those listed on the sheet, call the number given in the guarantee.

If repairs are required, contact De'Longhi Customer Experience only. Contact details are given in the guarantee certificate provided with the appliance.

SAFETY

Fundamental safety warnings

Danger!

This is an electrical appliance and may cause electric shock.

You should therefore respect the following safety warnings:

- Never touch the appliance with damp hands or feet.
- Never touch the plug with damp hands.

- Make sure the socket used is freely accessible at all times, enabling the appliance to be unplugged when necessary.
- Unplug directly from the plug only. Never pull the power cable as you could damage it.
- To disconnect the appliance completely, release the main switch at the back of the appliance by pressing it.
- If the appliance is faulty, do not attempt to repair. Turn it off, unplug from the mains socket and contact Customer Experience.
- If the plug or power cable is damaged, it must be replaced by De'Longhi Customer Experience only to avoid all risk.

Important!

- Keep all packaging (plastic bags, polystyrene foam) away from children.
- The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children must be supervised to ensure they do not play with the appliance.

Danger: Risk of burns!

This appliance produces hot water and steam may form while it is in operation.

Avoid contact with splashes of water or hot steam.

DESIGNATED USE

This appliance is designed and made to prepare coffee and heat drinks.

All other use is considered improper.

This appliance is not suitable for commercial use.

The manufacturer is not liable for damage deriving from improper use of the appliance.

This is an household appliance only.

It is not intended to be used in:

- staff kitchen areas in shops, offices and other working environments;
- farm houses;
- by clients in hotels, motels and other residential type environments;
- bed and breakfast type environments.

INSTRUCTIONS

Read these instructions carefully before using the appliance.

- Failure to follow these instructions may result in burns or damage to the appliance.
The manufacturer is not liable for damage deriving from failure to respect these instructions.

Please note:

Keep these instructions.

If the appliance is passed to other persons, they must also be provided with these instructions.

DESCRIPTION

Description of the appliance

(page 3 - A)

- A1. Beans container lid
- A2. Top lid
- A3. Grinding adjustment dial
- A4. Beans container
- A5. Pre-ground coffee funnel lid with pressure lock
- A6. Pre-ground coffee funnel
- A7. Main switch
- A8. Socket for power cable connector
- A9. Infuser
- A10. Infuser door
- A11. Cup warmer shelf
- A12. Control panel
- A13. Coffee spout (adjustable height)
- A14. Hot water and steam nozzle
- A15. Condensate tray
- A16. Water tank lid
- A17. Water tank
- A18. Water filter (some models only)
- A19. Cup tray
- A20. Drip tray water level indicator
- A21. Drip tray
- A22. Coffee grounds container

Description of the control panel

(page 2 - B)

A number of buttons on the panel have a double function. This is indicated in brackets in the description.

- B1.  button: turns the appliance on and off
- B2.  button: to select the coffee quantity
- B3. **MENU** button to access the menu (*When in the settings MENU, it acts as the "ESC" button to exit from the selected function and go back to the main menu.*)
- B4. Display: guides the user in using the appliance.
- B5.  /OK button: to deliver hot water (*When in the settings menu, press to confirm the selection*)
- B6.  button: to make 1 cup of coffee with the settings displayed
- B7.  aroma selection button: to select the coffee taste
- B8. **CAPPUCCINO** button: to deliver a cappuccino
- B9. **LATTE** button: to deliver a latte (*When in the settings menu, press to scroll backwards*)

B10. **FLAT WHITE** button: to deliver a flat white

B11. **HOT MILK** button: to deliver a cup of hot milk (*When in the settings menu, press to scroll forwards*)

B12.  button: to deliver steam

B13.  button: to make 2 cups of coffee with the settings displayed

Description of the milk container

(page 2 - C)

- D1. Froth adjustment and CLEAN dial
- D2. Frothed milk spout (adjustable)
- D3. Milk intake tube
- D4. Milk container

Description of the accessories

(page 2 - D)

- D1. Pre-ground coffee measure
- D2. Cleaning brush
- A18. Water filter (certain models only)
- D3. Cappuccino maker/hot water spout
- D4. Power cable
- D5. "Total Hardness Test" indicator paper
- D6. Descaler

PRELIMINARY CHECKS

Checking the appliance

After removing the packaging, make sure the product is complete and undamaged and that all accessories are present.

Do not use the appliance if it is visibly damaged.

Contact De'Longhi Customer Experience.

Installing the appliance

Important!

When installing the appliance, respect the following safety warnings:

- The appliance gives off heat.
After positioning the appliance on the worktop, leave a space of at least 3 cm between the surfaces of the appliance and the side and rear walls and at least 15 cm above the coffee maker.
- Water penetrating the coffee maker could cause damage. Do not place the appliance near taps or sinks.
- The appliance could be damaged if the water it contains freezes.
Do not install the appliance in a room where the temperature could drop below freezing point.
- Arrange the power cable in such a way that it cannot be damaged by sharp edges or contact with hot surfaces (e.g. electric hot plates).

Connecting the appliance

Important!

Check that the mains power supply voltage corresponds to the value indicated on the rating plate on the bottom of the appliance.

Connect the appliance to an earthed and correctly installed socket with a minimum current rating of 10A only.

If the power socket does not match the plug on the appliance, have the socket replaced with a suitable type by a qualified professional.

Using the appliance for the first time

Please note!

- Coffee has been used to factory test the appliance and it is therefore completely normal for there to be traces of coffee in the mill.

The machine is, however, guaranteed to be new.

- You should customise water hardness as soon as possible following the instructions in the section "Setting the water hardness" on page 18.

1. Insert the power cable connector into the socket at the back of the appliance and connect the appliance to the mains electricity supply (fig. 1). Make sure the main switch at the back of the appliance is pressed (fig. 2).

Select the desired language by scrolling forwards or backwards using the **HOT MILK or LATTE** button, or alternatively waiting for the language options to scroll automatically on the display (about every 3 seconds):

2. When "English" appears, press and hold the  /OK button (fig. 3) for a few seconds until "English set" is displayed.

Follow the instructions displayed by the appliance:

3. "FILL TANK!": remove the water tank (fig. 4), fill to the MAX line with fresh water (fig. 5) then replace in the appliance.
4. "INSERT WATER SPOUT!": Check that the hot water spout is inserted on the nozzle and place a container with a minimum capacity of 100 ml underneath (fig. 6).
5. "Hot water... Press OK?" is displayed;
6. Press the  /OK button to confirm (fig. 3). The appliance delivers water from the spout then goes off automatically.

The coffee maker is now ready for normal use.

Please note!

- When using the appliance for the first time, you need to make 4-5 cups of coffee or 4-5 cappuccinos before the appliance starts to give satisfactory results.

- When making the first 5-6 cappuccinos, it is normal to hear the noise of boiling water. After this, the noise becomes less.
- To enjoy your coffee even more and improve the performance of your appliance, we recommend installing a water softener filter as described in the section "INSTALL FILTER". If your model is not provided with a filter, you can request one from De'Longhi Customer Services.

TURNING THE APPLIANCE ON

Please note!

Before turning the appliance on, make sure the main switch on the back of the appliance is pressed (fig. 2).

Each time the appliance is turned on, it performs an automatic preheat and rinse cycle which cannot be interrupted.

The appliance is ready for use only after completion of this cycle.

Danger of burns!

During rinsing, a little hot water comes out of the coffee spouts and is collected in the drip tray underneath.

Avoid contact with splashes of water.

- To turn the appliance on, press the  button (fig. 7).
The message "Heating up... Please wait" is displayed.
After heating, the message "Rinsing..." is displayed. As well as heating the boiler, the appliance also heats the internal circuits by circulating hot water.
The appliance has reached the required temperature when a message is displayed indicating the coffee taste and quantity.

TURNING THE APPLIANCE OFF

Whenever the coffee machine is turned off after being used to make coffee, it performs an automatic rinse cycle.

Danger of burns!

During rinsing, a little hot water flows from the coffee spouts.
Avoid contact with splashes of water.

To turn the appliance off, press the  button (fig. 7). The appliance performs a rinse cycle, then the message "Turning off underway Please wait..." is displayed and the appliance goes off (standby).

Please note!

If the appliance is not used for an extended period, switch off the machine at the main switch.

- first turn the appliance off by pressing the  button (fig. 8);

- release the main switch at the side of the appliance (fig. 2).

Important!

Never press the main switch while the appliance is on.

MENU SETTINGS

When you access the programming menu by pressing the **MENU/ESC** button, the following menu items are available:

Rinsing

Use this function to deliver hot water from the spout to heat the internal circuit and make the coffee delivered hotter.

To enable the function, proceed as follows:

1. Press the **MENU/ESC** button to enter the menu;
2. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Rinsing" is displayed;
3. Press the /OK button. The message "Confirm?" is displayed;
4. Press the /OK (fig. 3): after a few seconds, hot water flows out of the spout, heating the internal circuit and making the coffee delivered hotter.

Please note!

Press any button to stop hot water delivery at any time.

Descalc

For instructions on descaling, see page 17.

Install filter

For instructions on how to install the filter, see the section "Installing the filter (page 18).

Replacing the filter

For instructions on how to replace the filter, see the section "Replacing the filter" (page 19).

Adjust time

To adjust the time on the display, proceed as follows:

1. Press the **MENU/ESC** button to enter the menu;
2. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Adjust time" is displayed;
3. Press the /OK button (fig. 3);
4. Press the **HOT MILK** or **LATTE** button (fig. 8) to change the hours;
5. Press the /OK button to confirm;
6. Press the **HOT MILK** or **LATTE** button (fig. 8) to change the minutes;
7. Press the /OK button to confirm.

This sets the time. Press the **MENU/ESC** button to exit the menu.

Auto-start

You can set the auto-start time in order to have the appliance ready at a certain time (for example in the morning) so you can make coffee immediately.

Please note!

To enable this function, the time must already have been set correctly.

To enable Auto-on, proceed as follows:

1. Press the **MENU/ESC** button to enter the menu;
2. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Auto-start" is displayed;
3. Press the /OK button. "Enable?" is displayed;
4. Press the /OK button to confirm;
5. Press the **HOT MILK** or **LATTE** button to choose the hours;
6. Press the /OK button to confirm;
7. Press the **HOT MILK** or **LATTE** button (fig. 8) to change the minutes;
8. Press the /OK button to confirm;
9. Press the **MENU/ESC** button to exit the menu.

Once the time has been confirmed, enabling of auto-start is indicated by the  symbol displayed alongside the time and under the Auto-start item in the menu.

To disable the function:

1. Select auto-start from the menu;
2. Press the /OK button. "Disable?" is displayed;
3. Press the /OK button to confirm.

The  symbol is no longer displayed.

Auto-Off

The time can be changed so that the appliance switches off after 15 or 30 minutes, or after 1, 2 or 3 hours.

To re-programme Auto-off, proceed as follows:

1. Press the **MENU/ESC** button to enter the menu;
2. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Auto-off" is displayed;
3. Press the /OK button;
4. Press the **HOT MILK** or **LATTE** button (fig. 8) until the desired operation time is displayed (15 or 30 minutes, or 1, 2 or 3 hours);
5. Press the /OK button to confirm;
6. Press the **MENU/ESC** button to exit the menu.

Auto-off is programmed.

Cup warmer

This function enables or disables the cup warmer.

Proceed as follows:

1. Press the **MENU/ESC** button to enter the menu;
2. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Cup warmer" appears on the display;

3. Press the /OK button. "Disable?" is displayed (or "Enable?" if the function has been disabled);
 4. Press the /OK button to disable (or enable) the function.
 5. Press the **MENU/ESC** button to exit the menu.
- Warming the cups keeps the coffee hot.

Energy Saving

Use this function to enable or disable energy saving mode.

When enabled, the function reduces energy consumption in compliance with European regulations.

To disable (or enable) "energy saving" mode, proceed as follows:

1. Press the **MENU/ESC** button to enter the menu;
2. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Energy saving" is displayed;
3. Press the /OK button. "Disable?" is displayed (or "Enable?" if the function has been disabled);
4. Press the /OK button to disable (or enable) energy saving mode;
5. Then press the **MENU/ESC** button to exit the menu.

When the function is enabled, if the machine is not used for about 1 minute, "Energy Saving" is displayed.

Please note!

- When in energy saving mode, a few seconds elapse before the first coffee, cappuccino or milk based coffee is delivered as the appliance must heat up again.
- To prepare any drink, press any button to exit energy saving, then press the button corresponding to the drink you want to make.
- If the milk container is inserted, "Energy saving" is not activated.

Setting the temperature

To modify the temperature of the water used to make the coffee, proceed as follows:

1. Press the **MENU/ESC** button to enter the menu;
2. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Set temperature" is displayed;
3. Press the /OK button;
4. Press the **HOT MILK** or **LATTE** button until the required temperature (● = low; ●●●● = high) is displayed;
5. Press the /OK button to confirm;
6. Press the **MENU/ESC** button to exit the menu.

Setting water hardness

For instructions on setting water hardness, see page 20.

Beep

This enables or disables the beep emitted by the machine each time the buttons are pressed or an accessory is inserted/removed. The beep is enabled by default.

To disable or re-enable the beep, proceed as follows:

1. Press the **MENU/ESC** button to enter the menu;
2. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Beep" is displayed;
3. Press the /OK button. "Disable?" or "Enable?" is displayed;
4. Press the /OK button to enable or disable the beep;
5. Press the **MENU/ESC** button to exit the menu.

Setting the language

To change the language for the display, proceed as follows:

1. Press the **MENU/ESC** button to enter the menu;
2. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Set language" is displayed;
3. Press the /OK button;
4. Press the **HOT MILK** or **LATTE** button until the required language is displayed;
5. Press the /OK button to confirm;
6. A message confirming the language installed is displayed;
7. Then press the **MENU/ESC** button to exit the menu.

Cup lighting

This function enables or disables the cup lighting. The lighting is enabled by default.

The lights come on each time coffee and drinks with milk are made and during each rinse cycle.

To disable or re-enable this function, proceed as follows:

1. Press the **MENU/ESC** button to enter the menu;
2. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Cup lighting" is displayed.
3. Press the /OK button. "Disable?" or "Enable?" is displayed;
4. Press the /OK button to enable or disable the cup lighting;
5. Press the **MENU/ESC** button to exit the menu.

Default values (reset)

This resets all menu settings and programmed quantities back to the default values (with the exception of the language which remains as previously set).

To reset the default values, proceed as follows:

1. Press the **MENU/ESC** button to enter the menu;
2. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Default values" is displayed;
3. Press the /OK button;
4. The message "Confirm?" is displayed.

5. Press the button to confirm and exit.

Statistics function

This displays statistics relating to the machine.

To display, proceed as follows:

1. Press the **MENU/ESC** button to enter the menu;
2. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Statistics" is displayed;
3. Press the button;
4. Press the **HOT MILK** or **LATTE** button (fig. 8) to verify:
 - how many coffees have been made;
 - the total number of cappuccinos and milk based coffees made;
 - the total number of litres of water delivered;
 - how many times the machine has been descaled;
 - how many times the water softener filter has been replaced.
5. Press the **MENU/ESC** button twice to exit the menu.

MAKING COFFEE

Selecting the coffee taste

he appliance is set by default to make coffee with a standard taste.

You can also choose one of these tastes:

Extra-mild taste

Mild taste

Standard taste

Strong taste

Extra-strong taste

To change the taste, press the button (fig. 9) repeatedly until the required taste is displayed.

Selecting the quantity of coffee in the cup

The appliance is set by default to make a standard quantity of coffee. To select the quantity of coffee, press the button (fig. 10) until the message corresponding to the required quantity of coffee is displayed:

Coffee selected	Quantity in cup (ml)
MY COFFEE	Programmable: from ≈20 to ≈180
SHORT	≈40
STANDARD	≈60
LONG	≈90
EXTRA LONG	≈120

Customising the "my coffee" quantity

The appliance is set by default to automatically deliver 30 ml of "my coffee".

To modify this quantity, proceed as follows:

1. Place a cup under the coffee spouts (fig. 14).
2. Press the button (fig. 10) until "MY COFFEE" is displayed.
3. Keep the button (fig. 11) pressed until the message "1 MY COFFEE Program quantity" is displayed and coffee delivery begins. Release the button.
4. As soon as the coffee in the cup reaches the required level, press the button (fig. 11) again.

The quantity of coffee in the cup has now been programmed.

Adjusting the coffee mill

The coffee mill is preset in the factory to make coffee correctly and should not require adjusting initially.

However, if after making the first few coffees you find that the coffee is too thin and not creamy enough or that delivery is too slow (a drop at a time), this can be corrected by adjusting the grinding adjustment dial (fig. 12).

Please note!

The grinding adjustment dial must only be turned when the coffee mill is in operation.

If the coffee is delivered too slowly or not at all, turn one click clockwise towards "7".

For fuller bodied creamier coffee on the other hand, turn one click anticlockwise towards "1" (do not turn more than one

click at a time otherwise the coffee could be delivered a drop at a time).

These adjustments will only be evident after at least 2 cups of coffee have been delivered.

If this adjustment does not obtain the desired result, turn the dial another click.

Tips for a hotter coffee

For a hotter coffee, before delivery you are recommended to:

- perform a rinse cycle by selecting the "Rinsing" function in the settings menu (page 10)
- warm the cups with hot water (using the hot water function);
- increase the coffee temperature in the settings menu (page 11).

Making coffee using coffee beans

Important!

Do not use caramelised or candied coffee beans as they could stick to the coffee mill and make it unusable.

1. Place coffee beans in the coffee bean container (fig. 13).

- Place under the coffee dispensing spouts, either:
 - 1 cup if you want one coffee (fig. 14);
 - 2 cups if you want 2 coffees.
- Lower the spouts as near as possible to the cup. This makes a creamier coffee (fig. 15).
- Press the button corresponding to the number of coffees required (1 cup  or 2 cups , figs. 11 and 16).
- Preparation begins. The amount of coffee selected is displayed together with a progress bar which gradually fills as preparation progresses.

Please note:

- While the machine is making coffee, delivery can be interrupted at any moment by pressing any button.
- At the end of delivery, to increase the quantity of coffee in the cup, just press (within 3 seconds) one of the coffee buttons ( or ).

Once the coffee has been made, the appliance is ready to make the next drink.

Please note!

- Various alarm messages could be displayed while using the machine (FILL TANK, EMPTY GROUNDS CONTAINER, etc.). Their meaning is explained in the section "Displayed messages" (page 20).
- For hotter coffee, see the section "Tips for a hotter coffee" (page 12).
- If the coffee is delivered a drop at a time, too weak and not creamy enough or too cold, read the tips in the "Troubleshooting" section on page 21.

Making coffee using pre-ground coffee

Important!

- Never add pre-ground coffee when the machine is off or it could spread through the inside of the machine and dirty it. This could damage the appliance.
- Never use more than 1 level measure or it could dirty the inside of the coffee maker or block the funnel.

Please note!

If you use pre-ground coffee, you can only make one cup of coffee at a time.

- Press the  button (fig. 7) repeatedly until "Pre-ground" is displayed.

- Open the beans container lid; then open the pre-ground coffee funnel lid by pushing on PUSH and, once released, open the lid.
- Make sure the funnel is not blocked, then add one level measure of pre-ground coffee (fig. 17).
- Place a cup under the coffee spouts.
- Press the 1 cup coffee button  (fig. 11).
- Preparation begins. The amount of coffee selected is displayed together with a progress bar which gradually fills as preparation progresses.

Please note!

If "Energy saving" mode is enabled, you may have to wait a few seconds before the first coffee is delivered.

MAKING DRINKS WITH MILK

Please note!

- To avoid producing milk with poor froth or large bubbles, always clean the milk container lid and hot water nozzle as described in the section "Cleaning the milk container" on pages 17.

Filling and attaching the milk container

- Remove the lid (fig. 18);
- Fill the milk container with a sufficient quantity of milk, not exceeding the MAX level marked on the container (fig. 19). Each mark on the side of the container corresponds to 100 ml of milk.

Please note!

- For a denser more even froth, you should use skimmed or partially skimmed milk at refrigerator temperature (about 5°C).
 - If "energy saving" mode is enabled, you may have to wait a few seconds before the first cappuccino is delivered.
- Make sure the milk intake tube is correctly inserted in the bottom of the milk container lid (fig. 20).
 - Place the lid back on the milk container.
 - Remove the hot water spout from the nozzle, by pressing the button.
 - Attach the container to the nozzle and push as far as it will go (fig. 21). The machine emits a beep (if the beep function is enabled).
 - Place a sufficiently large cup under the coffee and frothed milk spouts. Adjust the length of the milk spout. To move it nearer the cup, simply pull it downwards (fig. 22).
 - Follow the instructions below for each function.

Adjusting the amount of froth

Turn the froth adjustment dial on the milk container lid to adjust the amount of froth on the milk delivered while making drinks with milk.

Dial position	Description	Recommended for...
	No froth	LATTE/ HOT MILK
	Min. froth	FLAT WHITE
	Max. froth	CAPPUCCINO/ HOT MILK (FROTHED MILK)

Making drinks with milk automatically

The CAPPUCCINO, LATTE, FLAT WHITE and HOT MILK buttons on the control panel enable these drinks to be prepared automatically.

Proceed as follows:

1. Fill the milk container and attach it as described above.
2. Turn the froth adjustment dial on the milk container lid to the position corresponding to the required froth.
3. Press the button corresponding to the required drink. The name of the drink selected is displayed together with a progress bar which gradually fills as preparation progresses.
4. After a few seconds, frothed milk is delivered from the milk spout into the cup below. For drinks with coffee, the machine automatically makes the coffee after delivering the milk.

Please note!

- If during delivery you want to stop preparation, press the corresponding button.
- At the end of delivery, to increase the quantity of milk or coffee in the cup, just press (within 3 seconds) the button corresponding to the drink being made.
- Do not leave the milk container out of the refrigerator for long periods. The warmer the milk (5°C is ideal), the poorer the quality of froth produced.

Cleaning the milk frother with the CLEAN button

Important! Danger of burns

When cleaning the internal tubes of the milk container, a little hot water and steam leak out of the frothed milk spout. Avoid contact with splashes of water.

“SET DIAL TO CLEAN” flashes on the display each time you use a milk function. To eliminate all milk residues, proceed as follows:

1. Leave the milk container in the machine (you do not need to empty it);
2. Place a cup or other recipient under the frothed milk spout.
3. Turn the froth adjustment dial to “CLEAN” (fig. 22). A progress bar appears and gradually fills as the operation proceeds together with “Cleaning underway, Please wait”. Cleaning stops automatically.
4. Turn the dial back to one of the froth selections.
5. Remove the milk container and always clean the steam connection nozzle with a sponge.

Please note!

- To prepare a number of cappuccinos or milk based coffees, clean the milk container after you have prepared the last drink only.
- The milk container can be kept in the refrigerator.
- In some cases, to clean you must wait for the appliance to heat up.

Programming the quantity of coffee and milk in the cup for the CAPPUCCINO, LATTE, FLAT WHITE and HOT MILK buttons

The appliance is set by default to automatically deliver standard quantities.

To change these quantities, proceed as follows:

1. Place a cup under the coffee and milk spouts.
2. Press and hold the button corresponding to the drink you want to programme until the message “PROGRAM MILK Program quantity” is displayed.
3. Release the button. The appliance starts delivering milk.
4. Once the required quantity of milk has been delivered into the cup, press the button again.
5. The appliance stops delivering milk and after a few seconds the coffee is delivered into the cup. “PROGRAM COFFEE Program quantity” is displayed.
6. Once the required quantity of coffee has been delivered into the cup, press the button. Coffee delivery stops.

The machine is now reprogrammed with the new quantities of milk and coffee.

DELIVERING HOT WATER AND STEAM

Important! Danger of burns.

Never leave the machine unsupervised while delivering hot water or steam.

The spout becomes hot during delivery. Hold by the handle only.

Please note!

If "Energy Saving" mode is enabled, you may have to wait a few seconds before the hot water or steam is delivered.

Delivering hot water

1. Make sure the hot water spout is attached correctly (fig. 6).
2. Place a container under the spout (as close as possible to avoid splashes).
3. Press the /OK button (fig. 3). "Hot water" is displayed, together with a progress bar which fills gradually as preparation proceeds.
4. The machine delivers 250 ml of hot water, then delivery stops automatically.
To interrupt delivery of hot water manually, press the /OK button again.

Change the quantity of water delivered automatically.

The machine is set by default to automatically deliver 250 ml of hot water. To modify these quantities, proceed as follows:

1. Position a container under the spout.
2. Press the /OK button again until "Hot water Program quantity" is displayed, then release the /OK button.
3. When the hot water in the cup reaches the required level, press the /OK button again.

The machine is now reprogrammed with the new quantity.

Delivering steam

1. Make sure the hot water spout is attached correctly (fig. 6).
2. Fill a container with the liquid to be heated/frothed and immerse the spout/cappuccino maker in the liquid.
3. Press the button: after a few seconds, steam comes out of the cappuccino maker and heats the liquid; "STEAM" is displayed.
4. When the required temperature is obtained, interrupt steam delivery by pressing the button again.
(You should not discharge steam for more than 3 minutes at a time).

Important!

Always stop steam delivery before extracting the container containing the liquid to avoid burns from splashes.

Tips for using steam to froth milk

- When choosing the size of the container, bear in mind that the liquid doubles or triples in volume.

- For a richer denser froth, use skimmed or partially skimmed milk at refrigerator temperature (about 5°C).
- For a creamier froth, rotate the container with slow movements in an upward direction.
- To avoid milk with poor froth or large bubbles, always clean the spout as described in the following section.

Cleaning the spout after use

Always clean the spout after use to avoid the build-up of milk residues and prevent the spout from clogging.

1. Place a container under the cappuccino maker and press the /OK button to deliver a little water (fig. 3).
Stop the flow of water by pressing the /OK button again.
2. Wait a few minutes for the cappuccino maker to cool down, then extract the hot water spout.
Hold the spout with one hand by pressing the button and with the other, turn the cappuccino maker anticlockwise (fig. 24) and pull it downwards to remove it.
3. Also remove the steam nozzle by pulling it downwards (fig. 25).
4. Check the hole shown by the arrow in fig. 25 is not blocked. If necessary, clean with a pin.
5. Wash all parts of the cappuccino maker thoroughly with a sponge and warm water.
6. Reinsert the nozzle and replace the cappuccino maker on the nozzle, turning it and pushing it upwards until it is attached.

CLEANING

Important!

- Do not use solvents, abrasive detergents or alcohol to clean the coffee maker.
With De'Longhi bean to cup coffee makers, you need not use chemical products to clean the machine.
- None of the components can be washed in a dishwasher apart from the milk container (D).
- Do not use metal objects to remove encrustations or coffee deposits as they could scratch metal or plastic surfaces.

Cleaning the coffee grounds container

When "EMPTY GROUNDS CONTAINER" is displayed, the grounds container must be emptied and cleaned.

Until the grounds container has been cleaned, the appliance continues to display the message and coffee cannot be made.

Important! Danger of burns

If you make a number of cappuccinos one after the other, the metal cup tray becomes hot.
Wait for it to cool down before touching it and handle it from the front only.

To clean (with the machine on):

- Remove the drip tray (fig. 26), empty and clean.
- Empty the grounds container and clean thoroughly to remove all residues left on the bottom. This can be done with the spatula on the brush provided.
- Check the condensate tray (red) and empty if necessary.

When removing the drip tray, the grounds container must be emptied, even if it contains few grounds.

If this is not done, when you make the next coffees, the grounds container may fill up more than expected and clog the machine.

Cleaning the drip tray and condensate tray

The drip tray is fitted with a level indicator (red) showing the level of water it contains (fig. 27).

Before the indicator protrudes from the cup tray, the drip tray must be emptied and cleaned, otherwise the water may overflow the edge and damage the appliance, the surface it rests on or the surrounding area.

To remove the drip tray:

1. Remove the drip tray and the grounds container (fig. 26);
2. Empty the drip tray and grounds container and wash them;
3. Check the red condensate tray and empty if necessary.
4. Replace the drip tray and grounds container.

Cleaning the inside of the coffee maker

Before cleaning internal parts, the machine must be turned off (see "Turning off") and unplugged from the mains power supply.

Never immerse the coffee maker in water.

1. Check regularly (about once a month) that the inside of the appliance (accessible after removing the drip tray) is not dirty. If necessary, remove coffee deposits with the brush provided or a sponge.
2. Remove the residues with a vacuum cleaner (fig. 28).

Cleaning the water tank

1. Clean the water tank (A17) regularly (about once a month and whenever you replace the water softener filter (if provided) with a damp cloth and a little mild washing up liquid.
2. Remove the filter (if present) and rinse with running water.
3. Replace the filter (if provided), fill the tank with fresh water and replace the tank.

Cleaning the coffee spouts

1. Regularly clean the coffee spouts with a sponge or cloth (fig. 29A).
2. Check the holes in the coffee spout are not blocked. If necessary, remove coffee deposits with a toothpick (fig. 29B).

Cleaning the pre-ground coffee funnel

Check regularly (about once a month) that the pre-ground coffee funnel (A6) is not blocked. If necessary, remove coffee deposits with the brush (D2) supplied.

Cleaning the infuser

The infuser (A11) must be cleaned at least once a month.

The infuser may not be extracted when the machine is on.

1. Make sure the machine is correctly turned off (see "Turning the appliance off" on page 9).
2. Remove the water tank.
3. Open the infuser door (fig. 30) on the right side.
4. Press the two red release buttons inwards and at the same time pull the infuser outwards (fig. 31).
5. Soak the infuser in water for about 5 minutes, then rinse under the tap.

RINSE WITH WATER ONLY

NO WASHING UP LIQUID - NO DISH WASHER

Clean the infuser without using washing up liquid as it could be damaged.

6. Use the brush (D2) to remove any coffee residues left in the infuser housing, visible through the infuser door.
7. After cleaning, replace the infuser by sliding it onto the internal support; then push the PUSH symbol fully in until it clicks into place.

infuser support

i Please note!

If the infuser is difficult to insert, before insertion, adapt it to the right size by pressing the two levers shown in the figure.

7. Once inserted, make sure the two red buttons have snapped out.

8. Close the infuser door.
9. Replace the water tank.

Cleaning the milk container

Clean the milk container each time you prepare milk as described below:

1. Remove the lid.
2. Remove the milk spout and intake tube.
3. Turn the froth adjustment dial clockwise to the "INSERT" position (see figure) and pull off upwards.
4. Wash all the components thoroughly with hot water and mild washing-up liquid. All components are dishwasher safe, placing them in the top basket of the dishwasher. Make sure there are no milk residues on the hollow and groove under the dial (see figure alongside). If necessary, scrape the groove with a toothpick.
5. Rinse inside the froth adjustment dial seat with running water (see figure)

6. Check that the intake tube and spout are not clogged with milk residues.
7. Replace the dial (in correspondence to the word "INSERT"), spout and milk intake tube.
8. Place the lid back on the milk container.

Cleaning the hot water/steam nozzle

Each time you prepare milk, clean the nozzle with a sponge to remove milk residues from the gaskets (see figure alongside).

DESCALE

Descal the machine when the message "DESCALE" flashes on the display.

! Important!

- Descaler contains acids which may irritate the skin and eyes. It is vital to follow the manufacturer's safety warnings given on the descaler pack and the warnings relating to the procedure to follow in the event of contact with the skin and eyes.
- You should use De'Longhi descaler only. Using unsuitable descaler and/or performing descaling incorrectly may result in faults not covered by the manufacturer's guarantee.

1. Turn the machine on.
2. Press the **MENU/ESC** button to enter the menu.
3. Press the **HOT MILK or LATTE** button until "Descale" is displayed.
4. Select by pressing the δ /OK button: "Descale Confirm?" is displayed. Press δ /OK again to enable the function.
5. The message "Add descaler Confirm?" is displayed, alternating with "EMPTY THE DRIP TRAY" and "REMOVE FILTER" (if the filter is present).
6. Completely empty the water tank (A17) and remove the water filter (if present). Empty the drip tray (fig. 26) and grounds container, then put back in the appliance.
7. Pour the descaler into the tank up to the level **A** (corresponding to a 100 ml pack) marked on the side of the tank (fig. 32), then add water (one litre) up to level **B** (fig. 32). replace the water tank.

- Place an empty container with a minimum capacity of 1.5 litres under the hot water spout (fig. 4).

Important! Danger of burns

Hot water containing acid flows from the spout. Avoid contact with splashes of water.

- Press the **⏏/OK** button to confirm that you have added the solution.
 - The message “Descalc underway” is displayed.
 - The descale programme starts and the descaler liquid comes out of the water spout.
 - The descale programme automatically performs a series of rinses and pauses to remove limescale deposits from inside the machine.

After about 30 minutes, the message “Rinsing”/“INSERT FILTER” (if present), “FILL TANK” is displayed.

- The appliance is now ready for rinsing through with clean water. Extract the water tank, empty, rinse under running water, fill with clean water up to the MAX level, insert the filter (if removed previously) and put the water tank back in the machine. “Rinsing Confirm?” is displayed.
- Empty the container used to collect the descaler solution and replace it empty under the cappuccino maker.
- Press the **⏏/OK** button to start rinsing. Hot water flows out of the spout and the message “Rinsing Please wait” is displayed.
- When the water tank is completely empty, the message “Rinsing complete Confirm?” is displayed.
- Press the **⏏/OK** button.
- “Heating up Please wait” is displayed, at the end of which the machine will be ready for use.

SETTING WATER HARDNESS

The DESCAL message is displayed after a period of time according to water hardness.

The machine is factory set for a hardness value of 4.

The machine can also be programmed according to the hardness of the mains water in the various regions so that the machine needs to be descaled less often.

Measuring water hardness

- Remove the “total hardness test” indicator paper attached to this manual from its pack.
- Immerse the paper completely in a glass of water for one second.
- Remove the paper from the water and shake lightly. After about a minute, 1, 2, 3, or 4 red squares form, depending on the hardness of the water. each square corresponds to one level.

Set water hardness

- Press the **MENU/ESC** button to enter the menu.
- Press the **HOT MILK** or **LATTE** button to select “Water Hardness”.
- Confirm the selection by pressing the **⏏/OK** button.
- Press the **HOT MILK** or **LATTE** button and set the hardness shown by the indicator paper (see previous section).
- Press the **⏏/OK** button to confirm the setting.
- Press the **MENU/ESC** button to exit the menu.

The machine is now reprogrammed with the new water hardness setting.

WATER FILTER

Certain models are fitted with a water softener filter. If this is not the case with your model, you are recommended to purchase one from De’Longhi Customer Experience.

To use the filter correctly, follow the instructions below.

Installing the filter

- Remove the filter from the packaging.
- Turn the date indicator disk (see fig. 33) until the next 2 months of use are displayed.

i Please note

The filter lasts about two months if the appliance is used normally. If the coffee maker is left unused with the filter installed, it will last a maximum of three weeks.

- To activate the filter, run tap water through the hole in the filter as shown in the figure until water comes out of

the openings at the side for more than a minute (fig. 34).

4. Extract the tank from the appliance and fill with water.
5. Insert the filter in the water tank and immerse it completely for about ten minutes, sloping it to enable the air bubbles to escape (fig. 35).
6. Insert the filter in the filter housing and press as far as it will go (fig. 36A)
7. Close the tank with the lid, then put the tank back in the machine (fig. 36B).

When you install the filter, you must notify the appliance of its presence.

8. Press the **MENU/ESC** button to enter the menu;
8. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Install filter" is displayed;
10. Press the $\Delta\Delta$ /OK button;
11. The message "Enable?" is displayed.
12. Press the $\Delta\Delta$ /OK button to confirm the selection. "Hot water Confirm?" is displayed;
13. Position a container under the hot water spout (min. capacity: 500 ml);
14. Press the $\Delta\Delta$ /OK button to confirm the selection. The appliance begins hot water delivery and the message "Please wait" is displayed;
15. After delivery, the appliance returns automatically to the "Ready for coffee" position.

The new filter is active. You can now use the coffee maker.

Replacing the filter

When "REPLACE FILTER" is displayed, after two months (see date indicator) or when the appliance has not been used for 3 weeks, you should replace the filter:

1. Extract the tank and exhausted filter;
2. Take the new filter out of its packet and proceed as illustrated in points 2, 3, 4, 5 and 6 in the previous section.
3. Position a container with a minimum capacity of 500 ml under the hot water spout.
4. Press the **MENU/ESC** button to enter the menu;
5. Press the **HOT MILK** or **LATTE** button until "Replace filter" is displayed.

6. Press the $\Delta\Delta$ /OK button;
7. The message "Confirm?" is displayed.
8. Press the $\Delta\Delta$ /OK button to confirm the selection;
9. "Hot water... Confirm?" is displayed.
10. Press the $\Delta\Delta$ /OK button to confirm the selection. the appliance begins delivering hot water and the message "Please wait" is displayed.
11. After delivery, the appliance returns automatically to the "ready for coffee" position.

The new filter is now active and you can use the coffee maker.

Removing the filter

If you want to continue using the appliance without a filter, you must remove it and notify the appliance of its removal as follows:

1. Extract the tank and exhausted filter;
2. Press the **MENU/ESC** button to enter the menu;
3. Press the **HOT MILK** or **LATTE** button (fig. 8) until "Install filter Enabled" is displayed;
4. Press the $\Delta\Delta$ /OK button
5. "Disable?" is displayed;
6. Press the $\Delta\Delta$ /OK button to confirm and the **MENU/ESC** button to exit the menu.

TECHNICAL SPECIFICATION

Voltage:	220-240 V ~ 50/60 Hz max. 10A
Absorbed power:	1450W
Pressure:	15 bar
Water tank capacity:	2.0 litres max.
Size LxHxD:	238x350x445 mm
Cable length:	1.80 m
Weight:	11.8 kg
Beans container capacity:	250 g max.

CE The appliance complies with the following EC directives:

- EC Regulation 1275/2008 for standby;
- Low Voltage Directive 2006/95/EC and subsequent amendments;
- EMC directive 2004/108/EC and subsequent amendments
- Materials and accessories coming into contact with food conform to eec regulation 1935/2004.

DISPOSAL

 In compliance with European directive 2002/96/EC, the appliance must not be disposed of with household waste, but taken to an authorised waste separation and recycling centre.

DISPLAYED MESSAGES

DISPLAYED MESSAGE	POSSIBLE CAUSE	SOLUTION
FILL TANK	Insufficient water in the tank.	Fill the tank with water and/or insert it correctly, pushing it as far as it will go until it clicks into place.
EMPTY GROUNDS CONTAINER	The grounds container (A22) is full.	Empty the grounds container and drip tray, clean and replace. Important: when removing the drip tray, the grounds container must be emptied, even if it is not completely full. If this is not done, when you make the next coffees, the grounds container may fill up more than expected and clog the machine.
GROUND TOO FINE ADJUST MILL	The grinding is too fine and the coffee is delivered too slowly or not at all.	The grinding is too fine and the coffee is delivered too slowly or not at all. Repeat coffee delivery and turn the grinding adjustment dial (fig. 10) one click clockwise towards "7" while the coffee mill is in operation. If after making at least 2 coffees delivery is still too slow, repeat the correction procedure, turning the grinding adjustment dial another click until delivery is correct (see the section: "Adjusting the coffee mill" on page 12). If the problem persists, make sure the water tank is fully inserted, press the  /OK button and deliver a little water from the spout.
INSERT GROUNDS CONTAINER	After cleaning, the grounds container has not been replaced.	Remove the drip tray and insert the grounds container.
ADD PRE-GROUND COFFEE	With the pre-ground function selected, pre-ground coffee has not been poured into the funnel.	Place pre-ground coffee in the funnel or deselect the "pre-ground" function (fig. 17).
DESCALE	The machine must be descaled.	The descaling procedure described in the section "Descaling" needs to be performed as soon as possible (page 17).
LESS COFFEE	Too much coffee has been used.	Select a milder taste by pressing the dial  (fig. 9) or reduce the quantity of pre-ground coffee.
FILL BEANS CONTAINER	The coffee beans have run out.	Fill the beans container (fig. 13).
	The pre-ground coffee funnel is clogged.	Empty the funnel with the help of a brush as described in the section "Cleaning the pre-ground coffee funnel".
INSERT INFUSER ASSEMBLY	The infuser has not been replaced after cleaning.	Insert the infuser as described in the paragraph "Cleaning the infuser".
INSERT TANK	The tank is not correctly in place.	Insert the tank correctly and press as far as it will go.

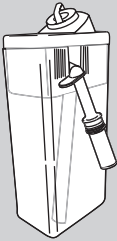

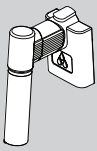

GENERAL ALARM	The inside of the appliance is very dirty.	Clean the inside of the appliance thoroughly, as described in the section "Cleaning and maintenance". If the message is still displayed after cleaning, contact a service centre.
EMPTY CIRCUIT FILL CIRCUIT <i>alternating with</i> Hot water press OK	The water circuit is empty.	Press OK to deliver water from the spout (A14) until it flows out normally.
REPLACE FILTER	The water filter is exhausted.	Replace the filter or remove it as described in the section "Water filter".
SET DIAL TO CLEAN	Milk has been delivered recently and the tubes inside the milk container must be cleaned.	Turn the froth adjustment dial to CLEAN.
INSERT WATER SPOUT	The hot water spout is not inserted or is inserted incorrectly.	Insert the water spout (D3) as far as it will go.
INSERT MILK CONTAINER	The milk container is not inserted correctly.	Insert the milk container (fig. 21) as far as it will go.

TROUBLESHOOTING

Below is a list of some of the possible malfunctions.

If the problem cannot be resolved as described, contact Customer Services.

PROBLEM	POSSIBLE CAUSE	SOLUTION
The coffee is not hot	The cups were not preheated.	<ul style="list-style-type: none"> Enable the cup warmer, leave the cups at least 20 minutes to warm up. Warm the cups by rinsing them with hot water (N.B. you can use the hot water function).
	The infuser has cooled down because 2/3 minutes have elapsed since the last coffee was made.	Before making the coffee, warm the infuser by using the Rinsing function to perform a rinse cycle (page 10).
	Low coffee temperature is set.	In the menu, set a higher coffee temperature.
The coffee is thin or not creamy enough.	The coffee is ground too coarsely.	Turn the grinding adjustment dial one click anticlockwise towards "1" while the coffee mill is in operation (fig. 12). Continue one click at a time until coffee delivery is satisfactory. The effect is only visible after delivering 2 coffees (see the section: "adjusting the coffee mill" on page 12).
	The coffee is unsuitable.	Use pre-ground coffee for espresso coffee makers
The coffee is delivered too slowly or a drop at a time.	The coffee is ground too finely.	Turn the grinding adjustment dial one click clockwise towards "7" while the coffee mill is in operation (fig. 12). Continue one click at a time until coffee delivery is satisfactory. The effect is only visible after delivering two coffees. (see the section "adjusting the coffee mill" on page 12).

Coffee does not come out of one of the spouts.	The spouts are blocked.	Clean the spouts with a toothpick (fig. 29B).
 <p>The milk does not come out of the milk spout.</p> <p>The milk contains large bubbles and squirts out of the milk spout or there is little froth .</p>	The milk container lid is dirty.	Clean the milk container lid as described in the section "Cleaning the milk container".
	the milk container lid is dirty.	Clean the milk container lid as described in the section "cleaning the milk container".
	the milk is not cold enough or is not semi-skimmed.	Use skimmed or semi-skimmed milk at refrigerator temperature (about 5° c). If the result is not as you wished, try changing brand of milk.
	The froth adjustment dial is incorrectly adjusted.	Adjust following the instructions in the section "making drinks with milk".
	The milk container lid or froth adjustment dial is dirty	Clean the milk container lid and dial as described in the section "cleaning the milk container".
 <p>The milk contains large bubbles there is little froth .</p>	The hot water/steam nozzle is dirty	Clean the nozzle as described in the section "cleaning the hot water/steam nozzle".
The appliance does not come on.	The spout is dirty.	Clean as described in the section "Cleaning the spout after use".
	It is not plugged into the mains socket.	Plug into the mains socket.
	The main switch (A7) is not turned on.	Place the main switch in the i position (fig. 2).
The infuser cannot be extracted	The appliance has not been turned off correctly	Turn the appliance off by pressing the  button (pag. 9).

ELECTRICAL CONNECTION (UK ONLY)

Before using this appliance ensure that the voltage indicated on the product corresponds with the main voltage in your home, if you are in any doubt about your supply contact your local electricity company.

The flexible mains lead is supplied connected to a B.S. 1363 fused plug having a fuse of 13 amp capacity.

Should this plug not fit the socket outlets in your home, it should be cut off and replaced with a suitable plug, following the procedure outlined below.

Note: Such a plug cannot be used for any other appliance and should therefore be properly disposed of and not left where children might find it and plug it into a supply socket - with the obvious consequent danger.

Please note: We recommend the use of good quality plugs and wall sockets that can be switched off when the machine is not in use.

IMPORTANT: The wires in the mains lead fitted to this appliance are coloured in accordance with the following code:

GREEN AND YELLOW	EARTH
BLUE	NEUTRAL
BROWN	LIVE

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

- The wire which is coloured green and yellow must be connected to the terminal in the plug which is marked with the letter E or by the earth symbol \perp or coloured green or green and yellow.
- The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
- The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

When wiring the plug, ensure that all strands of wire are securely retained in each terminal. Do not forget to tighten the mains lead clamp on the plug. If your electricity supply point has only two pin socket outlets, or if you are in doubt, consult a qualified electrician.

Should the mains lead ever require replacement, it is essential that this operation be carried out by a qualified electrician and should only be replaced with a flexible cord of the same size.

After replacement of a fuse in the plug, the fuse cover must be refitted. If the fuse cover is lost, the plug must not be used until a replacement cover is obtained. The colour of the correct replacement fuse cover is that of the coloured insert in the base of the fuse recess or elsewhere on the plug. Always state this colour when ordering a replacement fuse cover.

Only 13amp replacement fuses which are asta approved to B.S. 1362 should be fitted.

This appliance conforms to the Norms EN 55014 regarding the suppression of radio interference.

Warning - this appliance must be earthed
