1. With the help of another person, align the headboard and mattress platform. Insert the two assembly tongues into the corresponding tongue channels on the mattress platform. Firmly push the headboard and platform together.

2. The headboard-platform assembly needs to be turned on its back to install the bolts. A minimum of two people should carefully tilt the bed up and onto the back of the headboard.
3. There’s a zipper located on the bottom. Unzip the zipper to open up the access flap.
