

INSTANT LIT TREE ASSEMBLY INSTRUCTION MANUAL

Remark: FOR INDOOR USE ONLY
120V 60HZ

PLUG INTO WALL
OUTLET

Thank you for purchasing this **Instant Lit Tree**. This tree assembles in minutes and is decorated with CUL electric power pole system (PAT.-US 8905771 B2) and UL/CSA listed miniature light sets.

Carefully follow the instruction below on how to quickly and easily set up your new tree. Before assembling, choose an appropriate location near a wall outlet.

1. Assemble the tree stand and place on a level surface. (See Part.2)

2. Each tree section is numbered with a tag (e.g. SECTION A, B, C). Please identify all sections before assembling.
3. Insert the bottom section into the assembled stand. Make sure the pole is firmly inserted and secured into the stand.
4. Insert the middle section(s) to its lower section(s) until the very top is placed.
5. Once the tree sections are put together. Gently pull all branches down and into place. When adjusting branches make sure all wires are free of branch hinges.
6. Shape the branches. Starting with tips closest to the pole - position one tip to the right, one to the left and one at the center of the main stem as illustrated. Repeat this pattern for each branch

★.TROUBLE SHOOTING:

If any lights do not work on your pre-lit tree, please check the following instruction :

1. If entire tree or a section of the tree does not light:
 - a) Turn the pole gently to make sure pole and pole are connected into place.
 - b) Check all plugs are properly connected (See fig below) and power cord is plugged into wall outlet.
 - c) Check on/off foot pedal to insure it is in ON position.
 - d) Check fuses in tree's extension cords and replace if necessary (as instructed in **Fuse Replacement** section below). Please note that the 5-Amp extension cord fuse is different than the 3-Amp fuse used in the mini light sets.

2. If a strand of lights still does not work:
 - a) Check that all bulbs are tightly fitted inside the sockets and that no bulbs are broken or missing. Replace any broken or missing bulbs with replacement bulbs provided (as instructed in **Bulb Replacement** section below). If all bulbs are firmly in the sockets, slightly twist the bulbs from side to side to insure proper connection.
 - b) Check fuses in the mini light extension cord and replace if necessary.
IMPORTANT: This is the only time you are to remove the tape wrapping the outlets of the mini lights. Please remove tape to inspect 3-Amp fuse and replace tape to original condition after inspecting.
 - c) If the lights still do not work, carefully remove each bulb one by one out of the problem light string. Pull the bulb AND plastic base straight out of socket. Do not twist bulbs while removing from sockets. Check the two wires at the bottom of the bulb holder. Each wire should be aligned properly on the bulb holder to insure a proper connection in the lamp socket. If one wire is missing or too short, please replace it with a provided replacement bulb.

★CAUTION! – ALWAYS UNPLUG YOUR TREE FROM ITS POWER SOURCE BEFORE ATTEMPTING EITHER FUSE OR BULB REPLACEMENT.

FUSE REPLACEMENT:

This product comes with overload protection (fuse). A blown fuse indicates an overload or short circuit. If a fuse blows, unplug tree from wall outlet. Replace the fuse as per the fuse replacement instructions below (follow product marking for proper fuse rating). If the replacement fuse blows, a short circuit may occur and the product should be reviewed to determine the cause.

- A) Light set fuse replacement (replaceable 3-amp 125V fuses are located in the plug)
 1. Grasp plug and remove from its power source.
 2. Locate blown fuse(s) by sliding access cover on top of plug towards prongs.
 3. Remove blown fuse by turning the plug over. Fuse should fall into your hand (Gentle tapping may be required).
 4. Locate spare replacement fuses in spare parts bag.

(Exhibit A)

5. Insert new fuses. Close fuse cover by sliding fuse access cover towards the cord.

CAUTION: To reduce risk of fire – replace fuse in extension cord with only 3-amp 125-volt fuse. Do not replace attachment plug. Discard product if the attachment plug is damaged.

B) Extension cord fuse replacement (replaceable 5-amp 125V fuse is located in the plug):

1. Grasp plug and remove from its power source.
2. Locate blown fuse by sliding access cover on top of plug towards prongs.
3. Remove blown fuse.
4. Locate replacement fuse holder attached to cord near plug. Open holder and remove replacement fuse.
5. Insert new fuse. Close fuse cover by sliding fuse access cover towards the cord.

(Exhibit B)

CAUTION: To reduce risk of fire – replace fuse in extension cord with only 5-amp 125-volt fuse. Do not replace attachment plug. Discard product if the attachment plug is damaged.

BULB REPLACEMENT:

1. Grasp plug and remove from its power source
2. Pull bulb AND plastic base straight out of socket. Do not twist bulbs while you are removing them.
3. Replace burned out bulbs with replacement bulbs included in this product packaging ONLY.
(Additional bulbs are included for your convenience in spare parts bag).

IF PLUG DOES NOT FIT:

This product contains an extension cord with a polarized plug (one prong is wider than the other) as a feature to reduce the risk of electrical shock. This plug will fit in a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not use with an extension cord unless the plug can be fully inserted. Do not alter or replace the plug.

BASIC PRECAUTIONS SHOULD BE FOLLOWED WHEN USING THIS PRODUCT:

(Inspect product carefully before using or re-using):

1. This is an electrical product – not a toy! To avoid risk of fire, burns, personal injury and electrical shock it should not be played with.
2. Do not mount or place near gas or electric heaters, fireplaces, candles or other similar sources of heat.
3. Do not cover product with cloth, paper or any material when product is in use.
4. Do not hang ornaments or other objects from cord, wire, or light string. Hang ornaments only on the tree itself.
5. For your safety, unplug the product when leaving the house, retiring for the night, or if left unattended.
6. Do not let bulbs rest on the supply cord or on any wire.
7. Do not close doors or windows on the product or extension cords as this may damage the wire insulation.

STORAGE: Disassembled tree can be stored in its original box. Store tree in a cool dry place where the temperature does not exceed 100 degrees Fahrenheit.
