

## ASSEMBLY INSTRUCTIONS FOR PRESIDIO BED

Place the platform section of the bed flat on the floor.

Remove the nuts and washers from the four bolts.

With the help of an additional person, lift the headboard over the platform and align the four bolts in the headboard with the pre-drilled holes in the platform.

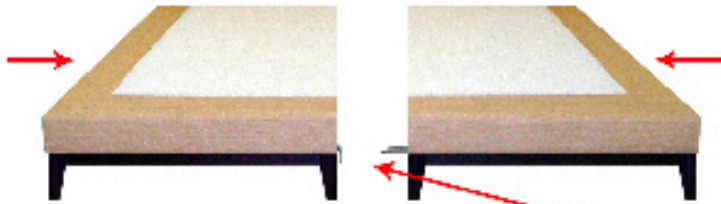

Bolts are intentionally engineered to move from front to back and side to side to allow for easier alignment. They will provide adequate support once all hardware is in place.

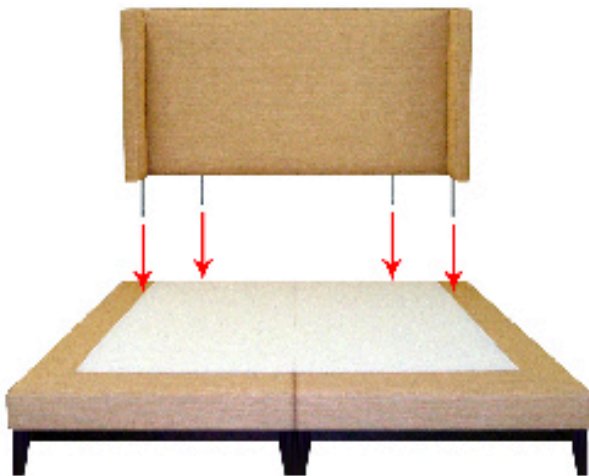

With one person steadying the headboard, slide the washer on the bolt first, and then tighten the nut to the bolt with a ratchet (as illustrated).

## ASSEMBLY INSTRUCTIONS FOR PRESIDIO BED (KING & CAL KING)

Align “ganging device” at foot of platform bed. With one person on each side, push platform together.

Place the platform section of the bed flat on the floor.

Remove the nuts and washers from the four bolts.

With the help of an additional person, lift the headboard over the platform and align the four bolts in the headboard with the pre-drilled holes in the platform.

Bolts are intentionally engineered to move from front to back and side to side to allow for easier alignment. They will provide adequate support once all hardware is in place.

With one person steadying the head-board, slide the washer on the bolt first, and then tighten the nut to the bolt with a ratchet (as illustrated).
