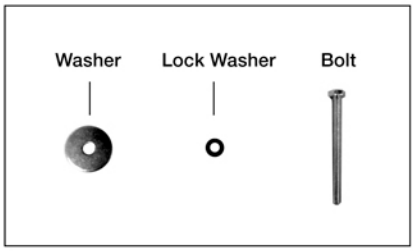
Platform Bed Assembly Instructions

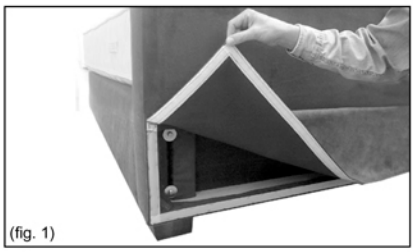
Parts King 8 Bolts, 8 Washers and 8 Lock Washers
Queen 6 Bolts, 6 Washers and 6 Lock Washers



Location The hardware is attached to the platform.
Remove the hardware, keeping the order of parts the same.

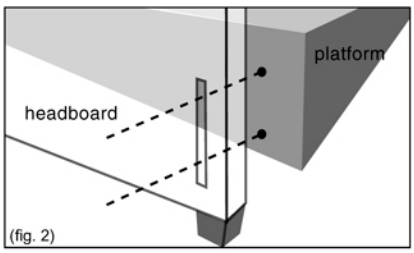
---

1. Open up the velcro patches on the bottom back of the headboard to expose the slots. Stand the headboard upright. (fig.1)



(fig. 1)

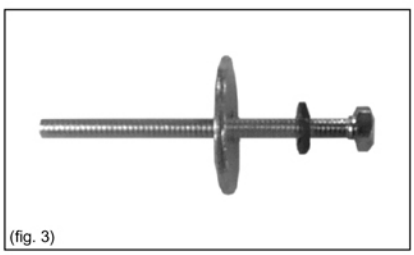
2. Align the bolt-holes in the platform portion of the bed assembly with the slots in the headboard. (fig.2)



(fig. 2)

For King size only
Make sure the locking mechanism between the two individual platforms is in the center. Insert bolt with the lock washer and the large washer through the slots into the bolt-holes in the head of the platform.
Slide the foot end of the two platforms together so that the mechanism locks securely.

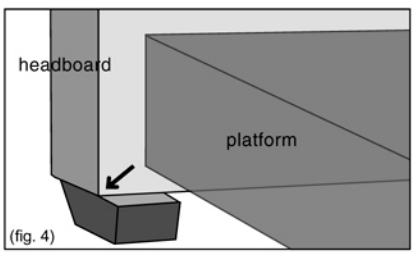
3. Make sure lock washer is between the large washer and bolt head. (fig.3)



(fig. 3)

4. The head of the platform (where the bolt-holes are located) should be resting on the ledge of the feet on the headboard. This will insure proper fit and will level the platform. (fig.4)

5. Finally, tighten the bolts securely, attaching the headboard to the platform.



(fig. 4)
