Operation

- Connect the Power Output Plug (9) into the DC Input Socket (6) at the back of the unit.
- Place the wine bottle in the Bottle Chamber (1) ensuring that it is pressed against the curved cooling plate.
- Connect the plug into a mains socket and switch on the supply.
- Press and hold the Power Switch (3). The display will come on and flash 6°C.
- Press the Selector Switch (4) to select the required temperature setting. A temperature between 6°C and 23°C can be selected.
- Press the Power Switch (3) to start the cycle. The Red Indicator (2) will come on and the display will show '--' for 4 minutes. The display will then show the current temperature of the wine bottle.
- You can also change the temperature readout from Celsius to Fahrenheit. With the unit plugged in, you have to turn off the led display, and then press and hold both the Power Switch and Selector Switch buttons for 10 seconds. It will prompt you to make the selection between C* OR F*.
- When the wine bottle has reached the selected temperature setting the red indicator will flash.
- The wine bottle can now be removed. If the wine bottle is left in the unit the indicator will continue to flash but the unit will maintain the wine bottle at the selected temperature.
- If the wine bottle is removed from the unit and then put back in, the control will check the wine bottle temperature and if necessary turn on the cooling system. In this case the indicator will stop flashing and remain illuminated. When the bottle temperature has returned to the selected temperature the indicator will start to flash again.
- Press and hold the Power Switch (3) to switch off the unit.
- Switch off the mains supply at the socket and remove the plug.

Note:

1. To reduce the time required to chill the wine to the selected temperature it is recommended that the bottle is first chilled in a refrigerator.
2. The cooler wine will naturally settle at the bottom of the bottle. The cooling process can be assisted by occasionally removing the bottle and gently tilting and rotating the bottle to mix the cooler and warmer wine.
3. There may be a difference of 2-3°C between the displayed temperature and the actual wine temperature, when the red indicator first starts to flash.

Environmental Note

This symbol on the product indicates that it must not be discarded as general household waste. The Federal Arbitration Act and federal arbitration law apply to the Terms and Conditions. We each agree that any dispute resolution proceedings will be conducted only on an individual basis and not in a class, consolidated or representative action.
